General Instructions

Use this form to defer the bonus depreciation addition when you haven't been able to use bonus depreciation on your federal returns due to loss limitations. This form is to track the correct bonus depreciation addition in subsequent years to the deferred year. If you checked the current year loss limitation box on Form 39R, Part A, line 5 or Form 39NR, Part A, line 3, complete and include this form with your return.

Note: Line 4 shows that the bonus depreciation addback is reduced in each subsequent year by the Idaho depreciation. Additionally, when the bonus depreciation addition is deferred, the Idaho bonus depreciation subtractions aren't allowed until the year after the deferred bonus depreciation addition is actually added back on the Idaho return.

Enter the year or years for the deferred bonus depreciation addition calculation.

You must keep records of the applicable Idaho tax basis of your interest in the pass-through entity, the at-risk amount and/or the balance of Idaho passive loss carryover limitations.
