

Batch Repricing

In the application list:

Click the + on *Maintenance*

Click the + on *Batch Valuation*

Double-click *Cost Models*

Use this section to define what parcels to price.

- All Parcels: EVERYTHING
- Input File: use a .txt file of LRSN numbers for a custom list.
- Parcel Set: a pre-saved list from Proval

This section allows for a range of fields.

Examples:

PIN:

From: RPG123000000

To: RPG12399999999

Neighborhood:

From: 421

To: 451

Once you have defined which parcels to price, click OK

LAST STEPS

You will be asked to save *price01.txt* again – save this somewhere on your computer.

Finally, you will be prompted to print the report.
