Up to 20 categories and 20 code areas can be entered.

OUTPUT SUMMARY (or NA):

This report lists parcel key, owners name, limits, and the categories in Parcel Master. The last page will list a recap of the categories selected, code areas selected, value, parcel count, and the limits.

SPECIAL CONSIDERATIONS:

If prompt #03 was answered with a 'N', a recap of parcels with the category selected that have no inventory in the land file, but have a land record, will be produced. This option is used in conjunction with AGB459 and LDB370 (The Land Rolls). Category value includes only those categories with no land investment inventory.
