PVB008
PV-CATEGORY RECAP

PROGRAM FUNCTION:

The program summarizes the values, acres, and parcel count by category.

REQUIRED RESPONSES SUPPLIED BY OPERATOR:

01   Printer Prompts

COMMENTS:

None

OUTPUT SUMMARY (or NA):

The report lists the following by category: land value, improvement value, other value, total value, acres and row count.   A grand total is provided for each column.

SPECIAL CONSIDERATIONS:

This report is used to balance against the "Valuation by Group" ProVal report during the ProVal Upload Checklist.   If the two reports do not balance call TSB for further assistance.

The "count" column displays the number of rows uploaded from ProVal and is NOT a parcel number count.

Verify that there are **NO** invalid categories. If unassigned group codes were missed during the Certification Process they must be fixed here. The unassigned code may be 98 or 99 and these are invalid in Parcel Master and must be fixed before proceeding.
