

RCB024
RC-LIST PARCELS WITH CHANGED BASE COST

PROGRAM FUNCTION:

This program compares the current base cost in the RC files with the new base costs returned by the calculation programs. When you make a change to your base cost file, or if we send you a fix to the calculations programs, this program will provide a listing of the affected parcels. The base cost printed is the total base cost for the parcel. This includes the main improvement, garage1, garage2, and other improvements. **REQUIRES DEDICATED UAD FILES.**

REQUIRED RESPONSES SUPPLIED BY OPERATOR:

01 Printer prompts

COMMENTS:

This program will go to the job queue.

OUTPUT SUMMARY (or NA):

This program will produce a detailed report showing the parcel number, sheet number, old base cost, new base cost, and the percent change. Only parcels with a change in the base cost will print.

NOTE: This is a **LONG running program** – it checks every parcel. It may take as long as 2-1/2 hours for this program to complete.

SPECIAL CONSIDERATIONS:

This program will NOT change the base cost in the RC files. To change the base costs, you will need to use the Entry/Update program RCO001.
