Return this form with a check or money order payable to: Idaho State Tax Commission, PO Box 83784, Boise ID 83707-3784

Instructions for Idaho Form 41ES

A. BUSINESS ESTIMATED TAX PAYMENTS

Who Must Make Estimated Tax Payments

A corporation must make estimated tax payments to the Tax Commission if it's required to make estimated tax payments to the Internal Revenue Service and will have an Idaho income tax liability of \$500 or more. Estimated tax payments aren't required if the corporation wasn't required to file an Idaho return the previous tax year.

If you received personalized payment vouchers (Form 41EST), use the appropriate voucher for each filing period. If any of the preprinted information is incorrect, draw a line through it and enter the correct information. Check the mailing address change box on the voucher if there's a change in your mailing address. If you don't have a preprinted form, use the Form 41ES, available at tax.idaho.gov.

Estimated Tax Payments

Each estimated tax payment must be 25% of the lesser of the corporation's income tax for the prior year or 90% of its income tax for the current tax year. Don't include fuels tax due, sales/use tax due, fuels tax refunds, tax from the recapture of qualified investment exemption (QIE) or the Reimbursement Incentive Act Credit reported on the income tax returns.

For corporations, the tax required to be reported is defined as Idaho taxable income multiplied by the appropriate tax rate, plus the permanent building fund tax, plus tax from recapture of business income tax credits, minus allowable income tax credits. A corporation making estimated tax payments in a year following the revocation of subchapter S status will use \$20 as the tax amount required to be reported on the prior year's return.

For S corporations, estimated tax payments are computed on the Idaho tax due to net recognized built-in gains and excess net passive income. Estimated tax payments aren't required on the tax due on income being reported for individual shareholders.

Computation of Estimated Tax Payments

The Form 41ES worksheet allows you to compare the income tax on last year's return with the anticipated income tax for the current year. Use the smaller of the two amounts to determine the estimated tax payment for each period. If your estimated tax payments are based on 90% of the income tax required to be paid on the current year's return and the anticipated income tax for the current year is revised, use the revised amount to recompute any remaining estimated tax payments.

Due Dates

For calendar year taxpayers, estimated tax payments are due by the 15th day of April, June, September, and December. For fiscal year taxpayers, estimated tax payments are due by the 15th day of the 4th, 6th, 9th, and 12th months of the tax year.

The due dates for the federal and Idaho estimated tax payments are the same. If the due date is on a Saturday, Sunday, or legal holiday, the payment is due on the next regular business day.

Underpayment of Estimated Tax

Interest is due on the difference between the amount of estimated tax payment required to be made on each voucher and the amount of estimated tax payment actually made. Interest is computed from the due date of the estimated payment until the required amount is paid or until the due date of the return. The interest rate for 2017 is 3%. The interest rate for 2018 is 4%.

Use Form 41ESR to determine the amount of any underpayments of tax and interest due when you file your return.

Overpayment of Estimated Tax

Excess estimated tax payments will be refunded after you file the completed return. You may apply all or part of the excess to next year's estimated tax by designating the amount on the Idaho Corporation Income Tax Return, Form 41, or the S Corporation Income Tax Return, Form 41S.

Overpayments will be applied to any prior year tax liabilities before carryovers or refunds are allowed. You'll be notified if your overpayment is applied to an existing liability, or is used to reduce your refund or carryover.

Annualized Income and Estimated Tax Payments

If your estimated tax payments are based on annualized income for federal purposes, you may use that same method for making Idaho estimated tax payments. The estimated tax due for the installment period is calculated by multiplying the applicable percentage (22.5%, 45%, 67.5%, and 90% for the 1st, 2nd, 3rd, and 4th installments, respectively) by the full year's tax on the annualized income for the period and deducting any prior installments.

Short Tax Year

If the short tax year ends prior to any remaining due dates, you must make a final estimated tax payment by the 15th day of the last month of the short tax year. You aren't required to make an estimated tax payment if the short tax year is less than four months or if you haven't met the requirements to make an estimated tax payment before the first day of the last month in the short tax year.

B. BUSINESS EXTENSION OF TIME PAYMENTS

General Information

If you can't file your Idaho return by the due date, you'll be allowed an automatic six-month extension of time to file without sending a written request. To qualify, you must pay at least 80% of the current year income tax liability or 100% of the total income tax reported on your income tax return for the preceding year, if one was filed. If you will owe \$50 or less, a payment isn't required; however, interest will accrue.

Paying less than the required amount will result in a penalty. A penalty will also result if you pay the required amount but don't pay the remainder of the tax due by the extended due date. Interest accrues on any balance of tax due on the return when it's filed.

Corporations

Multiply 7.4% by the estimated taxable income. If this results in less than \$20, use \$20 as the estimated tax. Add the \$10 permanent building fund tax to the estimated income tax and subtract the amount estimated for income tax credits.

S Corporations

S corporations are subject to tax on excess net passive income and net recognized built-in gains. Use 7.4% to compute the estimated tax on this income. If the estimated tax on these items is less than \$20 or the S corporation doesn't report income from these items, use \$20 as the estimated tax.

S Corporations, Partnerships, Trusts, and Estates with Individual Shareholders, Partners, and Beneficiaries

If the income is reported and the tax paid for the individual shareholders, partners, or beneficiaries, use 7.4% to compute the estimated tax. This is in addition to the tax computed for the S corporation, partnership, trust, or estate. Add the \$10 permanent building fund tax for each individual not filing an Idaho individual income tax return.

Trusts and Estates

Add the permanent building fund tax to the computed tax unless all income is distributed to beneficiaries, or if the trust is a qualified funeral trust.

C. PAYMENTS OF QIE RECAPTURE

Form 41ES may also be used to make payments of QIE recapture when you don't file your income tax return by the due date. Write "Payment of QIE Recapture" at the bottom of the form and return it with your check. Include a copy of Form 49ER.
