

## **GIS for Appraisal Analysis**

This hands-on class will offer ideas on how appraisers can use GIS data and maps, maintained by the County Assessor's office, to help them with their appraisal duties and analysis. For example, this class will work with maps showing ratios, sale prices, soil types, land types, appeals, etc. Also, there will be discussion to share ideas about how appraisers can use GIS along with an overview of (free) GIS viewing software that is available to an appraiser.
