

Evaluating Residential Construction – AQB Certified

This course shows how single-family houses are constructed from the ground up. More than 960 construction images and a 120-page reference manual illustrate site conditions, structure, envelope, interior and environmental system components for houses ranging from custom to affordable and even double-wides.

The educational objectives of this information-packed, one-day program are to:

- Present prevailing residential construction techniques with associated terminology
- Identify diverse levels of single-family housing construction quality
- Illustrate where to look for potential physical deficiencies in a house
