

REGIONAL TRAINING ANNOUNCEMENT

GIS/CAMA Linkage using ArcGIS

Description: This course is for county cadastral specialists and appraisers who are interested in linking GIS parcel data to CAMA data (AS/400 & ProVal data). Using the unique parcel identification number (PIN), cadastral specialists can link their CAMA data to their GIS parcel data.

Students will learn about the linkage program: create a join in ArcGIS, write queries in ArcGIS using the CAMA data, label maps using the CAMA data (ownership, acreage, PIN, etc.), visualize CAMA data, and click on a parcel to bring up a photo using the hyperlink tool. Students will also learn how to save their joined GIS Parcel/CAMA layer on the server to be viewed by other county personnel using free easy-to-use GIS software called ArcExplorer.

Instructor: Karl DeHart - State Tax Commission

Date: December 8, 2010

Time: 1:00 p.m. – 5:00 p.m.

Location: Renaissance Arts Center
Wilson Theatre
636 Fremont Avenue (one block away from the Courthouse)
Rupert, ID
