

Idaho Parcel Mapping Law

This one-day class will discuss Idaho's laws of assessment mapping. It will help the assessor, appraiser, mapper, and deed processor make decisions on how to map parcels and how to determine ownership. The class will review the development of parcel mapping laws and rules since 1863 and discuss important court cases on ownership and boundaries--including the 2006 changes in adverse possession law, and a recent court case on the width of a public right of way.
