

Mobile Applications for Appraisers and Mappers

This half-day class will introduce users to some of the newest mobile mapping technology. We will use the Windows platform. Users with Windows devices are encouraged to bring their devices but a tablet is not necessary. We will be looking primarily at offline, non-connected applications, where users can sync when connected. We will also be looking at, and working with, smartphone apps.

Instructor: Kevin Jones, Tax Commission
Date: Monday, January 9 (p.m.)
Location: Conference room 1CR5 (first floor) in Plaza IV –
Washington Group Complex (Tax Commission office)
Hours: 4
