

Intermediate QGIS

The Intermediate QGIS is a one-day hands-on course that will show you the power of open source GIS software. QGIS is a cross-platform **free** and **open-source** desktop geographic information systems (GIS) application that provides data viewing, editing, and analysis capabilities. This course will build on the basic principles of QGIS. A background in QGIS preferred but not required.

Instructor: Kevin Jones, Tax Commission

Dates: Tuesday, July 26

Location Central Plaza Training Room – Washington Group Complex

Hours: 7
