

IAAO Workshop 854 – CMS Case Problem Review

Workshop 854 provides a comprehensive review of the methods and applications of cadastral mapping. Participants are to have had IAAO's two mapping science courses and experience in cadastral mapping. **This is not an introductory workshop.** Topics include:

- Geometry of the Description
- Public Land Survey System
- Rules for Construction of the County Cadastre

Students will be exposed to typical mapping scenarios that they will encounter in the Cadastral Mapping Specialist (CMS) case study. Each exercise is followed by a discussion of the solution. There is no graded exam.

Recommended: STC Basic Mapping, IAAO Course 600, IAAO Course 601, or IAAO Workshop 650 and IAAO Workshop 651

Instructor: Rick Norejko, CMS

Dates: Monday, January 11 - Tuesday, January 12

Location: Ponderosa conference room – Wyndham Garden Boise Airport

Hours: 16
