

FPB360  
FP-FIRE PROTECTION - PARCEL CHANGE LIST

PROGRAM FUNCTION:

This program lists parcels that have been added, changed, or deleted which had a fire protection charge. This program provides an option to output the parcels to a file for the Department of Lands. (Use ["Procedure to Download FP File and Send to the Dept. of Lands"](#) under Technical Tips on the State Web site for instructions on how to get the file to the Dept of Lands.)

REQUIRED RESPONSES SUPPLIED BY OPERATOR:

- 01 Date of last transfer (MMDDYYYY)
- 02 Ending with date (MMDDYYYY)
- 03 Create AS/400 Download file for Dept of Lands? (Y or N)  
The default is "No", so you need to change it to "Y" in order to create the file.
- 04 If 'N', Do you want to list adds and deletes only? (Y or N)
- 06 Number of copies (1-255)
- 07 Output to printer ID
- 08 Put report on hold? (Y or N)

COMMENTS:

Fire wardens require a report listing all parcels that have been added or deleted. The Department of Lands requires the UADXFIRE file listing all parcels that have been added, changed, or deleted.

OUTPUT SUMMARY (or NA):

The report lists the county name, parcel number, previous parcel number, name, address, legal, acres, action code (A-ADDED, C-CHANGED, D-DELETE), and if a residential category was found (R).

SPECIAL CONSIDERATIONS:

The acres for deleted parcels come from the log file. The acres for added parcels come from Parcel Master.
