

FPB362
FP-FOREST PROTECTION MASTER FILE EDIT
WITH PARCEL MASTER AND SPECIALS FILE

PROGRAM FUNCTION:

This program compares the Forest Protection (FP) file with the Parcel Master file and the Specials file. The program looks for three things: 1) Is there a valid Parcel Master, 2) Is there a valid special record with a special code of 991/961, and 3) Are FP acres greater than PM acres?

REQUIRED RESPONSES SUPPLIED BY OPERATOR:

- 01 Printer prompts
- 02 Do you want this edit to print in:
 - 1) Alpha Order
 - 2) Numeric order(Enter 1 or 2)

COMMENTS:

None

OUTPUT SUMMARY (or NA):

The report lists the parcel number, name, and one of three edits:

- (1) No Parcel Master
- (2) Code 991/961 Not in File – will roll in (informational)
- (3) FP Acres > PM Acres (if difference is > 1.000 acre) Verify with local fire warden.

The program will compare the FP acres in the Forest Protection Master File (UAFPMF00) to the acres in the Category File (UACATG00). The program does not edit for acres in the Specials File (UASPEC00).

The report will total the acres, timber charge, FPA, and number of records for each of the three edit types. The report will list totals for the “FP charges which are correct” and grand totals. Totals from the FP file will print as well.

SPECIAL CONSIDERATIONS:

Grand totals may be different from FP File Totals. This occurs when a parcel(s) in the report has more than one edit type.
