

PVB007  
PV-CERTIFIED VALUES FROM PROVAL

PROGRAM FUNCTION:

This report lists the certified values in detail from ProVal. The report also lists any errors and gives a total of errors on the last page.

REQUIRED RESPONSES SUPPLIED BY OPERATOR:

01 Printer Prompts

COMMENTS:

This report is quite lengthy and is used for informational purposes only. It is not used for balancing during the ProVal checklist. The report will also list any errors for "unknown parcel" and "zero category," which should have been cleaned up with PVB001 and PVB016.

The report is also handy for viewing the values in the detail file as they will roll into parcel master.

OUTPUT SUMMARY:

This report lists the parcel number, category code, use code, improvement type, record number, review year, property class, land value, improvement value, other value, total value, and land size/unit per parcel and totals for each parcel. The report also indicates if the parcel has a HO or HO with CB.

SPECIAL CONSIDERATIONS:

None.
