Introduction

The Idaho State Tax Commission, in conjunction with the Internal Revenue Service (IRS), accepts state individual, corporate, S corporate, partnership, and **fiduciary** income tax returns and corresponding forms for tax year 2013 through the Modernized E-File system (MeF). The accepted forms are identified in the General Information section.

The transmission method will be a Web service using Simple Object Access Protocol (SOAP) with attachments messaging. The return data will be formatted using Extensible Markup Language (XML). Authorized e-file providers, also known as Electronic Return Originators (EROs), can submit returns to the IRS MeF system for federal and state return processing. State returns can be submitted as a federal return with a state return attached, called a “linked” return, or as a state return, known as an “unlinked” submission. Each return (linked or unlinked) must be in a separate submission. Multiple submissions may be contained in a single message payload. Software developers must test with the Tax Commission before submitting live linked or unlinked returns.

Acceptance and Participation

1. Idaho will accept returns electronically from any IRS-approved software provider. Software providers will work in a cooperative partnership effort with the Tax Commission.
2. Software providers must make the following information available to the Tax Commission for participation:
 - Software developer company name
 - Address
 - EFIN
 - ETIN
 - Primary contact name
 - Secondary contact name
 - Primary/Secondary telephone number
 - Primary/Secondary fax number
 - Primary/Secondary e-mail address

Developer's Responsibilities

Developed software must:

- Adhere to all federal and state procedures, requirements, and specifications. These requirements are specified in IRS Publication 4164, *Modernized e-File Guide for Software Developers and Transmitters*.
- Successfully complete all testing.
- Be developed according to statutory requirements and Tax Commission return preparation instructions.
- Provide accurate Idaho business and individual tax returns in correct electronic format.
- Provide data validation, verification, and error detection to prevent transmission of incomplete, inaccurate, or invalid return information.
- Be available to correct any software errors, which may occur after production begins, and work with the Tax Commission to follow up on any processing issues that may arise during filing season. If software providers need to update software, they should do it in a timely manner and then notify all customers.

Software Acceptance, Testing, and Approval

1. The testing system is available year round. The beginning test date for the next year's processing is subject to IRS availability and is subject to change. Developers will receive notification if the beginning test date is different than November. Testing outside the fed/state system (direct testing with Idaho) may be available if necessary.
2. The following can be found thru the Software and Forms Developers Web Link :
 - Idaho specific XML schema.

- Draft forms and instructions
 - Conforming to IRC information
3. Developers should support all schedules, forms, and occurrences that are available for individual, corporation, S corporation, partnership, and **fiduciary** e-filing for 2013. It's important that customers are given a complete range of services.
 4. Developers must include edits and verification based on the business rules provided for each field or data element. The Tax Commission spreadsheet will include information on field type, field format, length, the business rule edits, other edits for the field, and whether the field or data element can be negative or is recurring. Developers must closely follow the requirements for each field to ensure proper data formatting.
 5. Software must not be moved to production until developers receive Tax Commission approval by e-mail.

Acknowledgment System

1. The Tax Commission will generate an acknowledgment of acceptance or rejection for all returns received. The acknowledgement record will be in a format approved and agreed upon by the IRS, state agencies, transmitters, and software developers.
2. Transmitters and software developers should allow one business day to receive the state acknowledgment before contacting the Tax Commission.

Schemas and Transmission Specifications

1. Idaho adopted the TIGERS recommended structure in the development of forms-based schemas.
2. The TIGERS structure adopted by Idaho includes standardized schemas for header and binary attachments. Idaho will use a subset of the TIGERS Financial Transaction schema for direct deposit information of individual income tax returns. Direct deposit isn't available for business returns. **Idaho doesn't support IAT transactions; if IAT is indicated, a paper check will be sent to the taxpayer.**

3. Software developers should apply data from the spreadsheet or tax forms to the appropriate data element from the XML schema.
4. All XML data must be well formed.
5. Packaging of data and transmission payload must be in the proper format.

6. The Tax Commission rejects state returns for reasons outlined in Appendix A.
7. Returns filed in XML format with SOAP attachments allow for binary attachments to the submission. These attachments could consist of schedules, balance sheets, statement records, or other types of documentation as outlined in Appendix B. The allowed file type for attachments is file extension .PDF. The file order of attachments and procedures must follow the IRS requirements for binary attachments listed in IRS Publication 4163 at <http://www.irs.gov/pub/irs-pdf/p4163.pdf>. The Tax Commission allows for binary attachments to the state return with the appropriate naming convention for the description element.

Description = name as defined in Appendix C - PDF Description

DocumentType = PDF

AttachmentLocation = actual name of the attached PDF.

8. The Tax Commission supports simple and complex e-file types as outlined in Appendix B and Appendix C.

 - Each state return must include a complete copy of the federal return as submitted to the IRS and any attachments associated with that federal return.
 - The copy of the federal return must be submitted in the agreed upon IRS XML format.
 - Each submission must be a separate file.
 - Each state return must be submitted in the XML format specified and agreed upon by IRS, state agencies, transmitters, and software developers.
 - If the IRS rejects a fed/state submission, the state will not receive the state return portion. The fed/state submission must be re-submitted.
 - Each submission must be in Zip archive format as outlined in IRS Publication 4164 – *Modernized e-File (MeF) Guide for Software Developers and Transmitters*.
 - The SOAP message itself must not be compressed or zipped.

Whats New!

FILING STATUS

Your Idaho filing status must be the same as the filing status used on your federal return. This requirement does not apply to same sex couples who file a joint federal return; the State of Idaho does not recognize same sex marriages. If you filed a joint federal return as a same sex couple, compliance with Idaho law requires that each taxpayer:

- File an Idaho return as single or, if qualified, head of household for Idaho purposes, and

- Recompute your federal income tax return as if you had used either the single or, if qualified, head of household filing status, and

- Include those computations or your recomputed federal return with Idaho Form 40 or Form 43.

Check Digit Validation

The calculation for the check digit is *Modulus 10 Luhn's Sum of Digits*. It can be found in the scan line of all of the OCR scannable income tax returns. The check digit is found in position 39 of the scan line. The calculation to validate the check digit is performed on positions 1 through 38 of the scan line. The spaces separating two fields are **not** included in the calculations.

Numbers 0-9 are equal to their face value.

Numbers 10 and above are equal to the sum of their two digits.

Example: $10 = 1+0 = 1$

$14 = 1+4 = 5$

$18 = 1+8 = 9$

The letters of the alphabet are valued as follows:

A	B	C	D	E	F	G	H	I	J	K	L	M	N	O	P	Q	R	S	T	U	V	W	X	Y	Z
1	2	3	4	5	6	7	8	9	1	2	3	4	5	6	7	8	9	2	3	4	5	6	7	8	9

AMPERSAND (&) = 0, DASH (-) = 0, AND BLANK SPACES = 0

WEIGHTING FACTOR = 121212121 212121212 1212 12 1212 1 21 C

Check digit validation calculations are done as follows:

5	x 1=	5
1	x 2=	2
8	x 1=	8
0	x 2=	0
1	x 1=	1
0	x 2=	0

		1 + 0 = 1
1	x 1=	1
2	x 2=	4

5	x 1=	5

TOTAL		60

1. Sum of the digits. The sum in this example equals 60.
2. Divide the sum by 10. $60/10 = 6$ with a remainder of 0.
3. Subtract the remainder from 10. $10 - 0 = 10$.
4. The check digit equals 0.

Note: The "C" used in the example of weighting factor on the previous page designates the location of the check digit. It has no other purpose.

Note: If the remainder is equal to zero, the check digit is 0.

Name Control Guidelines

Name control must be the first **four** letters and/or characters of the last name. Do **not** include spaces. Do **not** include any punctuation with the exception of the ampersand (&), and the hyphen (-). If the legal business name includes the first word “The”, go to the next word to begin the four-letter name control (example shown below). If the name control is less than four letters, use the following examples to help you.

Business Name Control Samples

ABC The name control would be ABC (Space at the end after the “C”)
987654321 000456321 ABC 05 1213 A 95 6

ABC The name control would also be ABC (Remove spaces in the middle and compact the letters. Space is at the end)
987654321 000456321 ABC 05 1213 A 95 6

A+B, Inc: The name control would be ABIN (Remove the "+" and the comma)
987654321 000456321 ABIN 05 1213 A 95 9

A/B/C The name control would be ABC (Remove the “/”s and compact the letters. Space after “C”)
987654321 000456321 ABC 05 1213 A 95 6

A/B/C Company The name control would be ABCC (Remove the “/”s and compact the letters)
987654321 000456321 ABCC 05 1213 A 95 0

John Doe Inc. (Business): The name control would be JOHN
987654321 000456321 JOHN 05 1213 A 95 1

The ABC Company: The name control would be ABCC (Disregard “The” as part of the name control)
987654321 000456321 ABCC 05 1213 A 95 0

Spaces are placed only at the end of a name control. If the legal business name contains characters other than & (ampersand) or – (hyphen), remove them from the name control and collapse the letters.
