

315. USE OF RATIO STUDY TO EQUALIZE BOISE SCHOOL DISTRICT (RULE 315).

Sections 63-315, 33-802(6) Idaho Code.

~~(3-30-07)~~(_____)

01. Procedures for Boise School District Ratio Studies. The ratio study conducted by the State Tax Commission to comply with the requirements of Section 63-315, Idaho Code, shall be conducted in accordance with the “Standard on Ratio Studies” referenced in Rule 006 of these rules. The following specific procedures will be used. (4-2-08)

a. Information on property sales, which meet the requirements of arm’s length and market value sales, will be obtained and assembled into samples representing various primary categories, described in Subsections 130.02 through 130.06 of these rules, and secondary categories, described in Rules 510, 511, and 512 of these rules, within designations defined in Subsection 315.02 of this rule in the Boise School District. Except when sales or appraisals must be added or deleted to improve representativeness, sales used will be those occurring within the Boise School District between October 1 of the year preceding the year for which adjusted market value is to be computed and September 30 of the year for which adjusted market value is to be computed. Each sale price is to be adjusted for time and compared to market value for assessment purposes for the year for which adjusted market value is to be computed, to compute ratios to be analyzed. The State Tax Commission may use sales from extended time periods and may add appraisals when data is lacking. The State Tax Commission may delete sales when necessary to improve representativeness. (4-2-08)

b. A ratio will be determined for each sale by dividing the market value for assessment purposes of the property by the adjusted sale price or appraised value. (7-1-98)

c. A statistical analysis is to be conducted for the sales and any appraisals in each property designation described in Subsection 315.02 of this rule in the Boise School District and appropriate measures of central tendency, uniformity, reliability, and normality computed. (4-2-08)

d. With the exception of any property designations with extended time frames or added appraisals, if fewer than five (5) sales and appraisals are available, no adjustment to the taxable value of the designation will be made. (7-1-98)

e. If there are five (5) or more sales and appraisals and it is determined with reasonable statistical certainty that the property designation is not already at market value for assessment purposes, an adjusted market value will be computed for the Boise School District by dividing the taxable value for the year for which adjusted market value is to be determined by the appropriate ratio derived from the ratio study. The appropriate ratio to be used shall be the weighted mean ratio calculated from the sample for each designation, unless it can be clearly demonstrated that this statistic has been distorted by nonrepresentative ratios. In this case the median may be substituted: (4-2-08)

f. Within the Boise School District, adjusted market value or taxable value for each primary and each applicable secondary category of real, personal and operating property will be summed to produce the total adjusted market value for the Boise School District. The Boise School District taxable value will then be divided by this adjusted market value to produce the overall ratio of assessment in the Boise School District. Statewide totals are to be calculated by compiling county totals. (4-2-08)

g. Urban renewal increment values will not be included in the taxable value or the adjusted market value for the Boise School District. Upon receipt of an urban renewal agency’s resolution recommending the adoption of an ordinance for termination of a revenue allocation area by December 31 of a given year, the increment value in the immediate prior year will be included in the taxable value and the adjusted market value for the Boise School District. If the resolution is received prior to the first Monday in April, the actual value for the immediate prior year shall be adjusted by adding the increment value. If any ratio study based adjustments are warranted, as provided in this rule, they shall be applied to the actual value including the increment value. If the resolution is received on or after the first Monday in April, but by September 1, a corrected certification of actual and adjusted values shall be provided as soon as practical.(4-2-08)()

h. “Reasonable statistical certainty,” that the property designation in question is not at market value for assessment purposes, is required. Such certainty is tested using ninety percent (90%) confidence intervals about the weighted mean or median ratios. If the appropriate confidence interval includes ninety-five percent (95%) or one hundred five percent (105%), there is not “reasonable statistical certainty” that the property designation is not at market value for assessment purposes. (3-30-01)

i. Primary and secondary categories subject to adjustment following the procedure outlined in this rule and ratio study designations from which measures of central tendency used for adjustments will be derived are:

Secondary Categories	Primary Categories	Ratio Study Designations
12, 15, 18, or 20	Vacant Residential Land	Residential
10, 12, 15, 18, 20, 26, 31, 34, 37, 40, 41, 46, 47, 48, or 50	Improved Residential Property	Residential
47, 49, or 65	Manufactured Home on Leased Land	Residential
11, 13, 14, 16, 17, 21, or 22	Vacant Commercial or Industrial Land	Commercial
11, 13, 14, 16, 17, 21, 22, 27, 33, 35, 36, 38, 39, 42,	Improved Commercial or Industrial Property	Commercial

43, or 51		
-----------	--	--

(3-30-07)

j. For all secondary categories, described in Rule 510, 511, or 512 of these rules but not contained in the list in Paragraph 315.01.i. of this rule, adjusted market value will equal taxable value. (3-30-07)

k. “Appraisal” or “appraised value” refers to any State Tax Commission provided independently conducted property appraisal. (7-1-98)

02. Use of Property Designations. In computing the ratio for the Boise School District, the State Tax Commission will designate property as residential or commercial and shall assign appropriate primary categories, described in Subsections 130.02 through 130.06 of these rules, and secondary categories, described in Rules 510, 511, and 512 of these rules, to these designations as shown in Paragraph 315.01.i. of this rule. For the Boise School District, adjusted market value shall be computed by dividing the appropriate ratio ascertained for each of these designations into the sum of the taxable values for each primary and secondary category assigned to a designation. Except as provided in Subsection 315.06 of this rule, for the taxable value in any secondary category to be included in said sum, at least one (1) observation (sale or appraisal) from that secondary category must be present in the ratio study. If the ratio for any given designation in the Boise School District indicates that the market value for assessment purposes cannot be determined with reasonable statistical certainty to differ from statutorily required market value, the taxable value shown on the Boise School District abstract(s) required pursuant to Subsection 315.04 of this rule for each of the secondary categories included in that designation shall be the adjusted market value for said designation for said school district. (4-2-08)

03. Assessor to Identify Boise School Districts. Each county assessor will identify for the State Tax Commission which sales submitted for the ratio study are located within the Boise School District. (4-2-08)

04. Abstracts of Value for the Boise School District. Each applicable county auditor shall provide to the State Tax Commission abstracts of the taxable value of all property within the portion of the Boise School District in that county. These abstracts shall be submitted in the same manner and at the same time as provided for county abstracts of value. (4-2-08)

05. Urban Renewal Increment and Exemptions to be Subtracted. The taxable value of each primary or secondary category within the Boise School District shall not include the value that exceeds the value on the base assessment roll in any urban renewal district pursuant to Chapter 29, Title 50, Idaho Code, and shall not include the value of any property exempt from property tax. (4-11-15)

06. Exception from Requirement for at Least One Observation for Use of Secondary Category in Adjusted Value Determination. Properties identified as secondary

categories 10 and 31 rarely sell separately from farms and therefore do not appear in any ratio study. However, the level of assessment typically is similar to that of other rural residential property, including property in secondary categories 12, 15, 34, and 37. For any ratio study where there is an adjustment to be made to the assessed values in the residential designation, such adjustment shall be applied to any assessed value in secondary category 10, provided there is at least one (1) observation (sale) of property identified in either secondary category 12 or 15. Such adjustment shall also be applied to any assessed value in secondary category 31, provided there is at least one (1) observation (sale) of property identified in either secondary category 34 or 37.

07. Certification of Values. The values required to be certified to the county clerk by the first Monday in April each year under Section 63-315, Idaho Code, shall be published on the State Tax Commission's web site or provided in an alternate format on request by the first Monday in April each year to satisfy this required certification. (3-30-07)

08. Cross References. The primary categories are described in Subsections 130.02 through 130.06 of these Rules, and the secondary categories are described in Rules 510, 511, and 512 of these rules. The requirement to add increment value following dissolution of an urban renewal revenue allocation area is found in Section 33-802(6), Idaho Code. ~~(3-30-07)()~~
