

## **Agricultural Buildings**

This workshop provides students with instruction in the evolution of materials and techniques in agricultural buildings. Students will learn about differences in construction materials, quality, and cost and be able to grade each type of construction. Students will understand the components of each type of structure and how that affects the replacement cost new or reproduction cost new. There'll be discussion on functional and external (economic) obsolescence on older agricultural buildings, along with images and descriptions showing the different techniques of construction. Students will be able to discuss the grading and cost sections of a cost manual as compared to other costs in the field and price up different types of agricultural buildings, bins, and structures from today.

Instructor: Scott Johnson, RES  
Dates: Monday, January 9 – Tuesday, January 10  
Location: Delamar conference room (The Riverside Hotel)  
Hours: 16

**Note: This workshop will require a minimum of 15 students.**
