

Excel Can Do That?! – The Power Edition

This hands-on workshop introduces many of Excel's latest power features: Topics include:

- How to use “ideas” in Excel (“ideas” is a new artificial intelligence feature in Excel that show trends, summaries, outliers, and PivotTables, without writing any formulas.)
- How to create Power Pivot Tables and Power Pivot Charts
- How to create a Power Query
- How to create data models
- How to use a data model in Power BI
- Advanced features in setting up and creating Tables

Required Prerequisite:

Basic to intermediate experience - this is not a workshop for those with little to no background with Excel.

Instructor:

David Cornell, CAE, MAI Certified Microsoft Trainer,
Certified Excel Expert, Cornell Consulting, LLC
