

AGB472
AG-BASE COST EDIT

PROGRAM FUNCTION:

This program edits the Base Cost file and the Adjustment file.

REQUIRED RESPONSES SUPPLIED BY OPERATOR:

None

COMMENTS:

None

OUTPUT SUMMARY (or NA):

Only records that have an error are printed. If no records print (the page is blank) then none of the records in that file contain these errors. First the Base Cost file is printed, then the Adjustment files. The number of records in each category, total Base Cost records, total Rural Land Adjustment records and total Residential/Commercial Land Adjustment records are printed at the end of the report. Possible error messages are:

- 01 Category is not valid
- 02 Value equals zero or no value
- 03 Deleted record
- 04 Factor equals zero or no factor
- 05 Factor is less than -15%
- 06 Factor is greater than +15%
- 07 No description

Valid categories are 1, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 21, 22 and 57.

SPECIAL CONSIDERATIONS:

Once the errors have been checked, use AGO449 to correct errors in the Base Cost file, and AGO448 to correct errors in the Land Adjustments file. Then rerun this program to be sure all errors have been corrected.
