

PMB003
PM-QUANTITY AND VALUE RECAP BY CODE AREA

PROGRAM FUNCTION:

This program lists the total number of lots, acres, quantity, market value, market adjustment amounts and codes, homeowner exemption amounts, net market value, and the parcel count by code area. It then gives a grand total for each of these columns.

Like the PMB002, the PMB003 is a summary report that can be quickly produced for code area information. It is one of the three documents that the assessor presents to the clerk as the "roll". (PMB005, PMB006 & PMB003.)

It is also useful in the balancing procedure. It can be used to help find an error when the values are checked by code area. It should always balance with the PMB002.

REQUIRED RESPONSES SUPPLIED BY OPERATOR:

- 01 Limits
- 02 Parcel Types and Location Codes?

COMMENTS

This program goes to the job queue.

OUTPUT SUMMARY (or NA):

The report lists lots, acres, other, quantity, market value, market adjustment amounts and codes, homeowner exemption amounts, net market value, and parcel count by code area along with grand totals for all. It will also show your prompt responses and limits selected.
