

PMB024
PM-ABSTRACT - OFFICE COPY

PROGRAM FUNCTION:

This program prints a listing by category of Parcel Master values, homeowner and market adjustment exemptions. Market adjustment exemptions include BB - Hardship, CL - Casualty Loss, LI – Large Investment, RL – Remediated Land, SE – Small Employer, and UI – Unused Infrastructure

REQUIRED RESPONSES SUPPLIED BY OPERATOR:

01 Limits

COMMENTS:

None

OUTPUT SUMMARY (or NA):

This report lists totals for the following by category: quantity, market value, market adjustments, homeowner, abstract value, and count. This report also lists grand totals for market value, market adjustments, homeowner, and abstract value. A message will print stating that other types of adjustments must be manually figured in to the amounts on this report in order to balance with PMB005 – the Abstract that is remitted to the State Tax Commission. Limits and parcel number counts are printed at the end of the report.

SPECIAL CONSIDERATIONS:

Spec Homesite (“SH”) type market adjustments are **not** included in this report because the amounts for the Spec Homesites stored in the category file as market value is the actual taxable value – the SH homesite amount has already been subtracted out.
