

PVB009
PV-CLASSIFICATION RECAP

PROGRAM FUNCTION:

The program summarizes the values, acres, and parcel count by classification.

REQUIRED RESPONSES SUPPLIED BY OPERATOR:

01 Printer Prompts

COMMENTS:

None.

OUTPUT SUMMARY (or NA):

The report lists the following by classification: land value, improvement value, other value, total value, acres and row count. A grand total is provided for each column.

SPECIAL CONSIDERATIONS:

This report is used to balance against the ProVal "Valuation Interface Report" during the ProVal Certification Checklist. If the two reports do not balance call TSB for further assistance.

The "count" column displays the number of rows uploaded from ProVal and is NOT a parcel number count.
