

YDB424
YD-MILL DATA LIST

PROGRAM FUNCTION:

This program will list mill information for specified dates by mill number, then compliance number within each mill number.

REQUIRED RESPONSE SUPPLIED BY OPERATOR:

- 01 Enter Harvest year (YYYY)
- 02 List by: (Choose one)
 - 1. Details
 - 2. Totals by mill
 - 3. Grand totals
- 03 All mills? (Y or N)
If 'N', enter mill number (XXXXX)
- 04 All compliances? (Y or N)
If 'N', enter compliance number (XXXXXX)
- 05 Beginning date (MMYYYY)
- 06 Ending date (MMYYYY)
- 07 Parcel Status (A or I)
- 08 Printer prompts

OUTPUT SUMMARY (or N/A)

There will be a separate page for each mill number and it's mill name containing the following information:

Compliance number, parcel number, harvest month/year, owner's name, beginning date, ending date, (2) columns of species description, unit and volume. There will be a total page per mill number with two columns by code, description, unit and volume.

The volume by units include:

- | | |
|-------------------------|-----------|
| M - Thousand board feet | T - Ton |
| LF - Lineal feet | CD - Cord |

The last page will give grand totals per species with code, description, unit and volume printing within the designated period, as well as limits.

SPECIAL CONSIDERATIONS:

Messages: 'Invalid Compliance Number' indicates the compliance number has been removed from the compliance file, after the record had been entered. 'Invalid Mill Number' indicates the mill number was removed from the mill file after the entry was made.

Entering a '1' to prompt #02 will output detail, totals by mill, and grand totals. Entering a '2' will output totals by mill and grand totals. Entering a '3' will output grand totals only.
