

Instructions to Download SLB441 Summary Sales Listing

Run SLB441 as you have in the past.

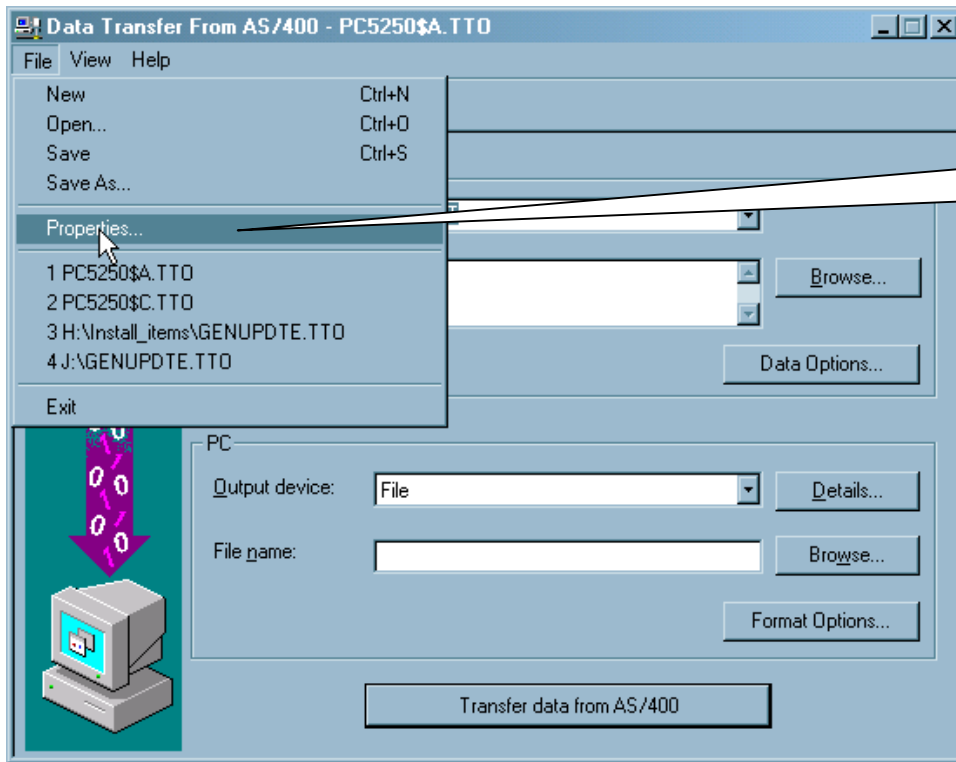

From an AS/400 session window do the following:

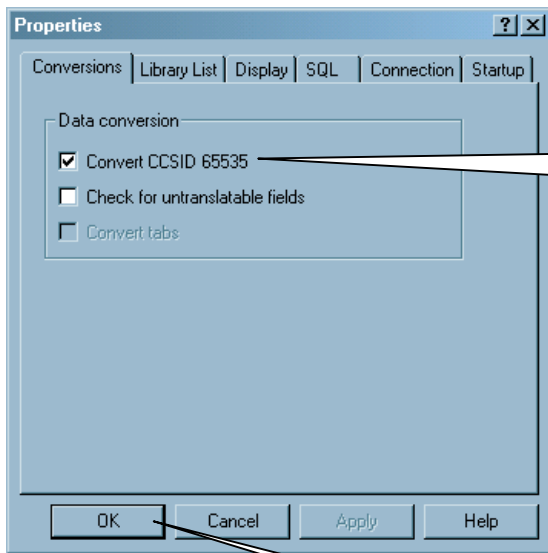

Click on "Transfer" in the menu bar and choose "Receive File From Host."

The Data Transfer Window now appears.

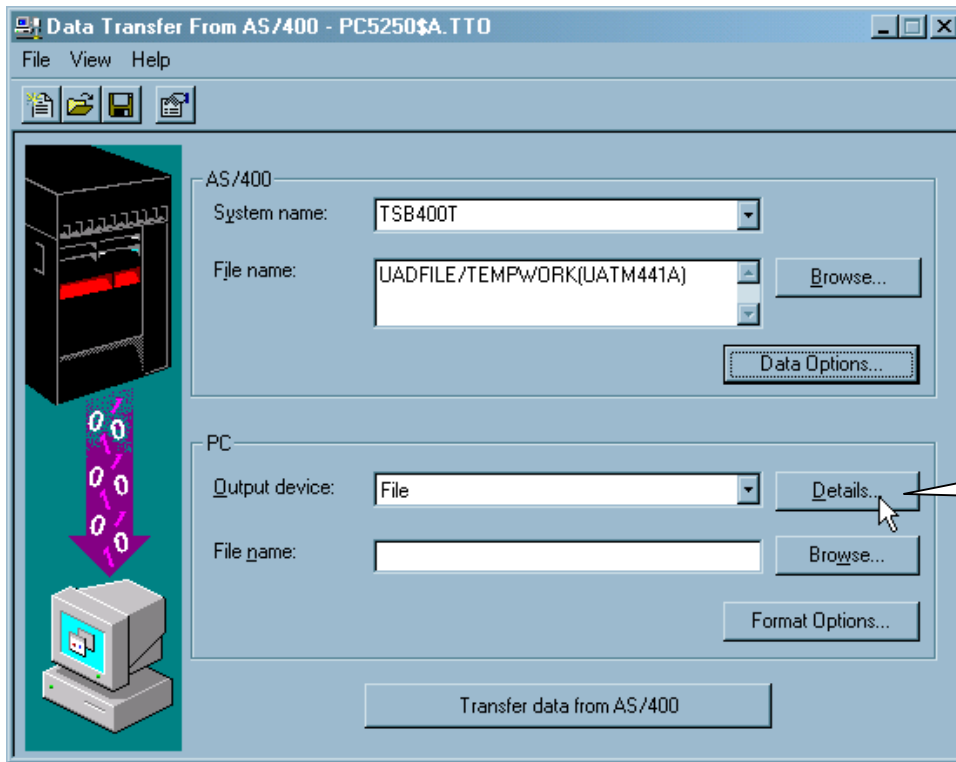

Click on "File" in the Menu Bar and choose "Properties..."

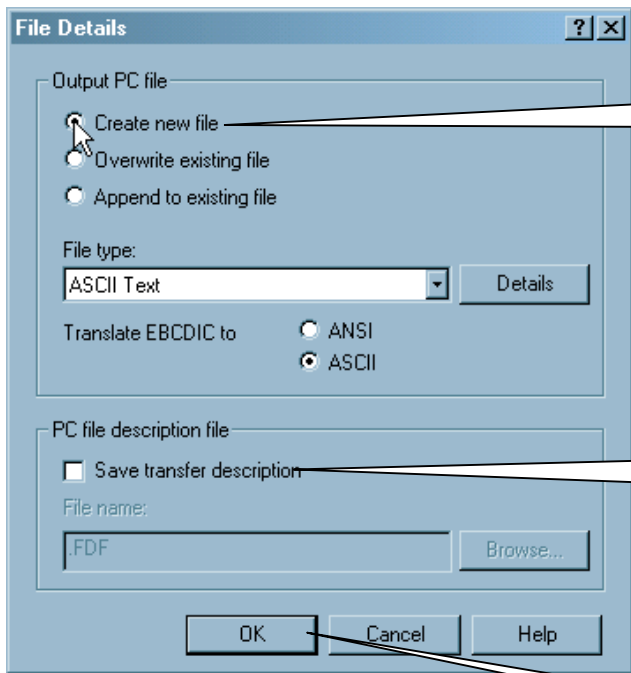

In the Properties window under the "Conversions" tab, click the "Convert CCSID 65535" box so that it is CHECKED.

Click OK when finished.

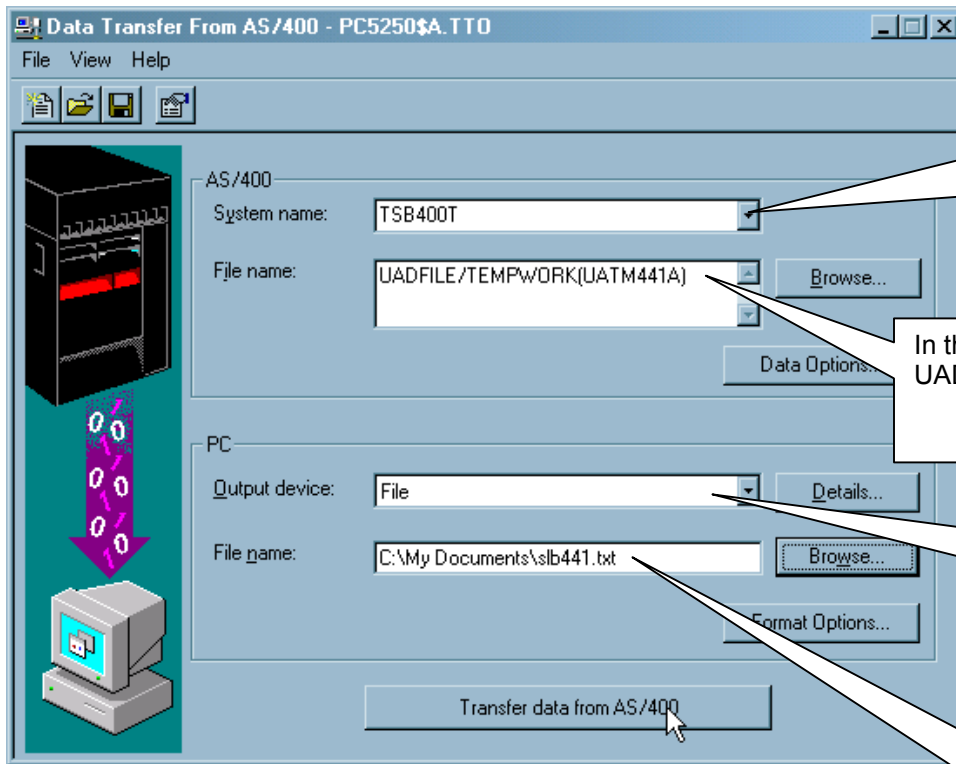

Next, click the "Details..." button.

In the File Details window, Click the "Create new file" button so that it is selected.

Next, click the "Save transfer description" button so that it is **NOT** selected.

Click OK when done.

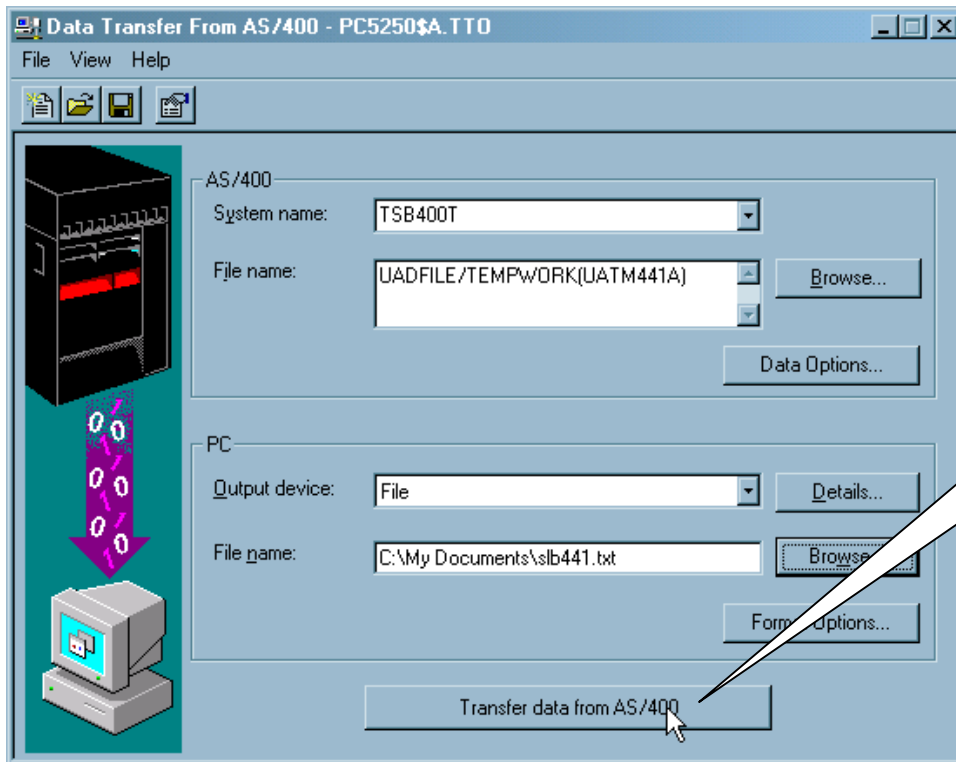

In the System name box, type in the system name or use the drop down arrow to choose the system name.

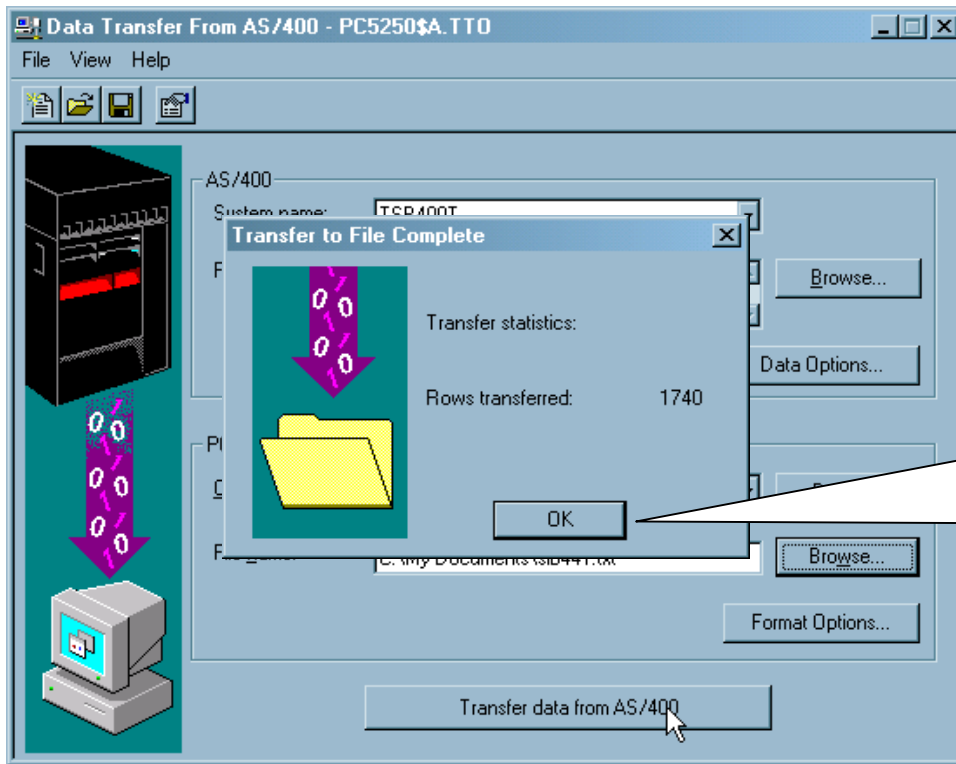

In the "File name" box type: UADFILE/TEMPWORK(UATM441A)

"Output device" should default to File, if not use drop down arrow to select "File."

Type the path and file name that you want to save to... in this example we called the file "slb441.txt."

Once everything is entered correctly...
Click the "Transfer data from AS/400" button.

Your file is now on the PC in the file and path you chose and is ready for import into Excel.
