## STATE AND LOCAL TAX BURDEN ANALYSIS EXECUTIVE SUMMARY FY 2013 TAXES

Idaho's revenue and taxation picture is typified by moderate to low overall taxes and a broad structure with good balance between tax components. Idaho relies principally upon three major taxes: income, sales and property.

On the basis of taxes paid <u>per person</u>, Idaho's overall tax burden ranks 49<sup>th</sup> nationally (out of 51) and 11<sup>th</sup> regionally (out of the 11 western states), both unchanged since FY 2010.

<u>RA</u>	<u>NK</u>	<u>RANK</u>
Property tax 42	38.3% below national average	10 30.9% below western median
Sales tax 35	20.6% below national average	9 29.4% below western median
Individual income 35	22.3% below national average	6 equal to the western median
Corporate income 32	25.9% below national average	5 0.4% above western median
Overall ranking 49	31.2% below national average	11 18.3% below western median

Because of relatively low income in Idaho, the state's overall tax burden <u>relative to income</u> is 41<sup>st</sup> nationally and 11<sup>th</sup> among the 11 western states.

Property tax	37 22.3% below national average	9	11.6% below western median
Sales tax	26 0.1% above national average	9	6.9% below western median
Individual income	31 5.6% below national average	5	0.8% above western median
Corporate income	23 6.6% below national average	4	11.7% above western median
Overall ranking	41 13.3% below national average	11	7.5% below western median

Between FY 2012 and FY 2013, Idaho overall relative tax burdens were unchanged except for a one rank increase relative to income. On an overall basis, Idaho taxes remain considerably below the U.S. average on both income-based and per capita based analyses:

	Per \$1,000 of Income	Per capita
Idaho total tax burden	\$ 90.06	\$3,165
National average total tax burden	\$103.82	\$4,599
Western median total tax burden	\$ 97.38	\$3,875

Because per capita income in Idaho is 20.7 percent lower than the U.S. average, ranking systems which compare taxes to income will show higher comparative taxes in Idaho than systems which are based on population.

Idaho's major taxes continue to show balance with little change between FY 2012 and FY 2013. In 2013, property taxes raised 28.0% of overall tax revenue, while income taxes accounted for 29.2% (individual for 25.3% and corporate income tax for 3.9%), and sales tax accounted for 25.9% of state and local tax revenue.

### **COMPARATIVE TAX POTENTIAL:**

Tax Burden in Idaho and the United States
Fiscal Year 2013

Analysis by Alan S. Dornfest
Property Tax Policy Bureau Chief - Property Tax Division
Idaho State Tax Commission

#### TAX BURDEN IN IDAHO AND THE UNITED STATES - FISCAL YEAR 2013

#### **IDAHO TAX REVENUE SYSTEM - SUMMARY:**

In terms of the amount of revenue collected in comparison to income and population, Idaho tax collections tend to indicate low overall taxes, with excellent balance between major tax components. When observed on a regional basis, Idaho is in the somewhat unusual position of relying on three major taxes (income, sales, and property), as opposed to the systems hinged on only two taxes that are found in each of our border states except Utah. On the basis of taxes paid per person, the breadth of the Idaho system, produces the effect of being moderate to low in most specific major tax types, while ranking our overall per capita tax burden 49<sup>th</sup> highest nationally and 11<sup>th</sup> highest (lowest) in the 11 western states. Idaho has very low per capita income (with a rank of 50<sup>th</sup> nationally out of 51 states and the District of Columbia and 11<sup>th</sup> out of the 11 western states), and this raises our tax burden relative to income to 41<sup>st</sup> nationally, but still 11<sup>th</sup> in the western states. This year's overall per capita tax burden rankings are unchanged, while our income based tax burden rankings are slightly higher than the FY 2012 rankings. The current rankings remain close to those indicated in the years leading up to the recent major recession.

The Idaho tax system has tended over the long run to rely relatively less on property tax and sales tax, and relatively more on motor vehicle taxes and income taxes in comparison to both regional and national practices. This year's pattern reflects some changes, with sales tax now appearing slightly higher than income tax in comparison to national average relative burdens. Income tax still appears higher than sales tax on a regional relative basis, using the 11 western states as a comparison group. Property taxes continue to show low relative tax burden, both on a national and regional basis.

Similar overall patterns emerge using either income-based or population-based comparisons; however, our tax burden appears lower when computed on a per capita basis. This reflects our relatively very low per capita income, which trails the national average by 20.7% and is lower than any state except Mississippi.

A comparison of FY 2012 and FY 2013 Idaho tax burden shows the following for our major taxes:

• Idaho's individual income tax burden continued to decrease, going from 14.1% over the U.S. average in FY 2008 to 5.6% below the U.S. average in FY 2013, relative to total personal income. This represents the lowest relative burden for this tax since at least FY 1984, the first year this tax was studied separately from corporate income tax. For the individual income tax, Idaho's income based ranking has dropped from 19<sup>th</sup> highest in 2008 to 31<sup>st</sup> highest in 2013. In addition to representing the lowest burden, this is the lowest rank on this basis since this report series began in FY 1984. Our population based ranking followed the same pattern of significant decreases from 23<sup>rd</sup> in FY 2007 to 35<sup>th</sup> in FY 2013.

- Corporate income tax burden is highly volatile due mostly to variations in corporate taxable income. On an income basis, the relative burden in Idaho decreased from 4.8% below the U.S. average in FY 2012 to 6.6% below the U.S. average in FY 2013. This reflects a 5.8% increase in collections in Idaho compared with a 7.6% increase in collections nationally.
- Property tax burdens in Idaho remain very low, but increased slightly in FY 2013. Relative to income, these taxes are now 22.3% below the U.S. average, their highest relative point since FY 2006. The 2.7% rate of increase in property tax collections in Idaho slightly exceeded the national 2.1% rate of increase.
- Idaho's relative sales tax burden increased slightly in FY 2013 and is now 0.1% above the U.S. average. Sales tax collections in Idaho grew 7.5%, while nationally, growth in this tax was only 3.8% The relative burden of sales tax in Idaho is now the highest since FY 2009 and more closely resembles the burden during the 2006 2009 period.
- Idaho's relative motor vehicle tax burden (fuel taxes and licenses and registration fees) increased slightly from 40.3% over the U.S. average in FY 2012 to 43.2% over the U.S. average in FY 2013. Although the relative burden of these taxes remains well above the national average, the FY 2013 burden is relatively low for Idaho. Lower relative burdens occurred only in FY 2012, FY 2009, and FY 1984 since this study was begun. Comparisons between states are difficult for these taxes, because some states require motor vehicles to pay personal property tax, in which case the amounts would be included in the property tax category. Idaho's motor vehicle registration fees are in lieu of property tax and tend to inflate the apparent relative level of Idaho motor vehicle taxes.

Overall state and local taxes in Idaho increased 4.9% in FY 2013. This was up from the 3.0% increase between FY 2011 and FY 2012, and was slightly more than the national rate of increase of 4.6%. Our relative overall tax burden changed only slightly from FY 2011 to FY 2013. Except for FY 2010 and FY 1981, Idaho's taxes during these three years were the lowest as a percent of total personal income since this analysis was undertaken in FY 1977.

Idaho's major taxes traditionally have been balanced. In FY 2013, property taxes raised 28.0% of overall tax revenue, while income taxes accounted for 29.2% (individual for 25.3% and corporate income tax for 3.9%), and sales tax accounted for 25.9% of our tax revenue.

Regionally, western states either do not have sales tax or tend to rely more on this tax than most other areas of the country. For many years, this study showed Idaho with the lowest relative sales tax among western states using the tax. This pattern began to change in FY 2007, with Colorado in the bottom position. In FY 2008 and FY 2009, California and Colorado were the two western states with lower sales tax burden than Idaho, relative to income. Beginning in FY 2010 and continuing through FY 2013, Idaho's sales tax burden again dropped with respect to other western states and we have maintained the position of lowest in the 9 western states that use the tax.

Table 1 summarizes changes in tax collections in Idaho and nationally over the most recent one year period.

Table 1: Change in Total Tax Collections FY 2012 - FY 2013

Тах Туре	Idaho - FY 2012/2013 Percent Change	U.S FY 2012/2013 Percent Change		
Property	2.7%	2.1%		
Sales	7.5%	3.8%		
Individual Income	11.3%	9.2%		
Corporate Income	5.8%	7.6%		
Motor Vehicle	3.1%	1.0%		
Overall	4.9%	4.6%		

#### METHODOLOGY:

Tax burdens throughout the nation can be compared by determining tax collections in proportion to the personal income in a given state and comparing this to the hypothetical tax generated by applying the national average tax rate to each state's income. In addition, a per capita tax burden can be determined by applying the national average per capita amount of any tax to each state's population. The result of these calculations is known as a state's tax capacity or tax potential, since the amount shown represents tax that would have been collected in each state if the tax rates for that state equaled the national average rate. This then tells us where each state stands in relation to the national average in terms of tax revenue generating ability.

If a state's potential tax or tax capacity is greater than its actual tax, that state is underutilizing its tax potential relative to the average state. Similarly, a state is overutilizing its tax potential if its actual tax collections exceed the potential determined from the average tax rate. The degree of over or under utilization is known as the tax effort, which is expressed as an index in relation to 100%, the point at which no over or under utilization is indicated.

Throughout this report, ranks are assigned with 1 equaling the highest relative taxes (or income on the per capita income chart).

#### NATIONAL CONDITIONS:

Total nationwide state and local taxes for fiscal year 2013 were \$1,455.5 million, up 4.6% since FY 2012. This was larger than last year's 3.6% increase. Total personal income increased 1.0% to \$14,018,965 million. The national average state and local tax rate increased from 10.01% in FY 2012 to 10.38% of income in FY 2013, more in line with average rates for FY 2011 and 2010. This reflects the slower growth in total personal income during the last year.

In 2013, total U.S. population increased by 0.8% to 313,874,000. The average overall per capita tax increased 4.0% to \$4,599.

Tax burden studies look at the overall burden of one or more taxes on the economy using either total personal income or population as proxies of economic strength. These studies do not enable the determination of the tax incidence on any particular sector, such as wage earners or business or agricultural property. In general, however, states that typically overutilize most or all taxes tend to be the ones with high tax burdens, especially relative to income. In FY 2013 the greatest overall tax overutilization was found in New York (\$48.8 billion), while the greatest amounts of underutilization were \$17.5 billion in Florida and \$17.1 billion in Texas. Patterns for New York, Texas, and Florida have become ingrained over time.

The most significant overall tax burden changes in FY 2013 were in Maryland and Wyoming with tax burden rank in Maryland increasing from 30<sup>th</sup> in 2012 to 19<sup>th</sup> in 2013, while the rank in Wyoming decreased from 4<sup>th</sup> in FY 2012 to 13<sup>th</sup> in FY 2013. Interestingly, Nebraska's rank decreased from 21<sup>st</sup> in 2011 to 31<sup>st</sup> in 2012, but has increased to 24<sup>th</sup> in FY 2013, illustrating the point that long term ranks are more indicative of tax burden conditions than single year changes. Per capita rank changes were not as pronounced, with the largest change noted in Utah where the per capita overall rank increased from 44<sup>th</sup> in FY 2012 to 39<sup>th</sup> in FY 2013.

There were few significant property tax rank changes; of note were decreases in Nevada on the income based analysis (-5) and increases in Maryland on the same basis (+7).

Using the income based relative burden charts, sales tax rank changes were most pronounced in Colorado (+8), Iowa (-10), and Wyoming (-10).

The most significant individual income tax rank changes were decreases in Delaware (-6) and Kansas (-8).

The greatest rank changes in corporate income taxes were in Maine (-14), Montana (+8), and Oklahoma (+8), using income based analysis. Overall, in corporate income tax, there was less volatility than has been indicated in recent years.

Large income based rank changes in motor vehicle and motor fuel taxes occurred in Wyoming (+10 following -12 in FY 2012), New Mexico (+18), and Nebraska (-8).

It is important to place the most emphasis on long-term trends, since often, when state rankings swing back and forth from year to year, this is an indication of data continuity problems, reporting errors, and short-term economic or tax policy changes, rather than long-term changes in taxation patterns or policies.

#### **DISTORTING FACTORS:**

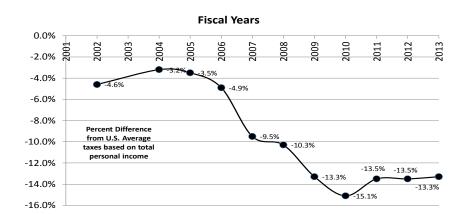

Each year states have one-time or atypical collections or refunds, which may be large enough to affect individual state rankings or even to distort national averages used to compute each state's tax burden. For this reason, long-term patterns of taxation should be ascertained by comparing states over several years. In addition, substitution of one tax for another may make the imposed tax appear higher. This effect is most apparent in states that have not enacted sales or income taxes. However, substitution of higher vehicle registration fees for personal property taxes on vehicles can alter apparent relative tax burdens (see: Idaho Revenue System - Summary).

For longitudinal analysis, all of the tax information presented in this study has been analyzed under the same methodology since the fiscal year 1984 study was prepared. Prior to that time, corporate and individual income taxes were combined, but identical utilization methodology has been employed back to fiscal year 1980. Reports beginning in FY 1977 are available from the Idaho State Tax Commission.

#### **SUMMARY OF IDAHO'S TAX BURDEN:**

Prior to 2002, the long-term pattern in Idaho had been a relative overall tax burden slightly above the U.S. average using income based analysis and significantly below the U.S. average on a per capita basis. Since that time, as shown in the following chart, total relative tax burdens in Idaho have dipped well below the U.S. average when compared to income.

The all-time low (since fiscal year 1977) was reached in FY 2010, followed by a slight increase in FY 2011. This comparison has been essentially level since that time.

Idaho's overall tax burden per dollar of income was unchanged and remains well below the national average.

Our income based relative ranking increased slightly from  $42^{nd}$  in FY 2012 to  $41^{st}$  in FY 2013. Idaho's per capita ranking remained at  $49^{th}$ , significantly below the U.S. average using this measure.

In FY 2013, Idaho underutilized all taxes by \$780.4 million using income as a basis for comparison. This was the greatest comparative underutilization since this report series began in fiscal year 1977.

The overall tax burden in Idaho in FY 2013 increased 4.0%, to \$90.06 per \$1,000 of income. Overall taxes increased 4.9% during this period and total personal income increased 1.0% over the same period. Our per capita taxes increased 4.0%, to \$3,165.20 for each person. National average taxes in FY 2013 were \$103.82 per \$1,000 of income (3.8% higher than in FY 2012) or \$4,598.77 for each person. Table 2 shows our tax effort and corresponding rank on a national level. An effort of 100% would indicate taxes equal to the U.S. average effective tax rate based either on total personal income or population for a particular tax or overall.

Table 2: FY 2013 Idaho taxes in comparison to U.S. averages

	Based on Income		Based on Population		
Type of Tax	Tax Effort %	Rank*	Tax Effort %	Rank*	
Property	77.7	37	61.7	42	
Sales	100.1	26	79.4	35	
Individual Income	94.4	31	74.9	35	
Corporate Income	93.4	23	74.1	32	
Motor Vehicle	143.2	6	113.6	17	
Overall	86.7	41	68.8	49	

<sup>\*</sup>Note: Lower ranks equal higher taxes, with 1 being the highest.

Between FY 2012 and FY 2013, per capita income in Idaho was virtually unchanged, while the national average per capita income increased 0.2%. Idaho per capita income remains low, falling in relative terms to 20.7% below the U.S. average. Ranking systems which compare taxes to income will show higher comparative taxes in Idaho than systems which are based on population.

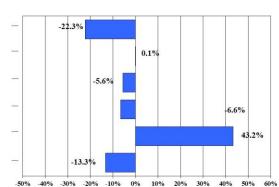

Table 3 compares Idaho's tax and income ranks for the most recent five analysis periods and shows how many states utilize each tax (the District of Columbia is considered a "state" for the purposes of this chart and all rankings in this report).

Table 3: Relative income and tax ranks for Idaho since FY 2009

		Incom	Income Basis for Rank				Population Basis for Rank				
Type of Tax	Number of States	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013
Property	51	39	38	38	38	37	41	41	41	41	42
Sales	47	24	27	27	28	26	34	37	38	38	35
Individual Income	44	26	25	26	30	31	32	32	33	33	35
Corporate Income	47	26	37	24	21	23	33	40	29	29	32

Overall	51	43	46	41	42	41	48	51	49	49	49
Per Capita Income	51	45	50	50	49	50	XX	XX	XX	XX	XX

Graphically, Idaho's income based tax burden can be viewed as follows:

FY 2013 Taxes Idaho vs. U.S.

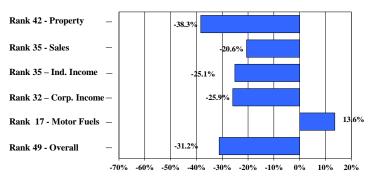

Rank of 1 = highest tax Based on Taxes per \$ of income

Percent Difference from U.S. Average

On a per capita population) basis, our tax burden can be viewed using the following chart:

## FY 2013 Taxes Idaho vs. U.S.

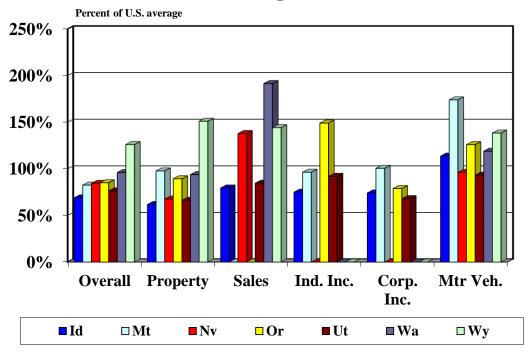

Rank of 1 = highest tax Based on Taxes per person

Percent Difference from U.S. Average

On a regional basis, Idaho can be effectively compared to states within the 11 western states area. A comparison with only our immediate neighboring states indicates the following:

# Fiscal Year 2013 Tax Burden Idaho vs. Neighbor States

Based on per capita taxes. States compared to U.S. average.

The charts found on the next four pages indicate the results of income and population based comparisons both regionally and nationally. The first two charts show only ranks, while the final two indicate effective tax rates or amounts.
