# Comparative Tax Potential: 

# Tax Burden in Idaho and the United States 

Fiscal Year 2020

Analysis by Sharlene Davis
Research Analyst, Principal
Idaho State Tax Commission
Prepared December 2022

Population information is from U.S. Census Bureau state estimates - see: BEA Interactive Data Application
Tax revenue information is available from the U.S. Census Bureau, at 2020 State \& Local Government Finance Historical Datasets and Tables (census.gov,) although information supplied for this report may vary slightly from Census website information because income is derived from U.S. Bureau of Economic Analysis quarterly estimates and averaged to better represent fiscal year income.

Some explanatory material was prepared by Alan Dornfest for use in previous editions of this analysis and has been reproduced for the current report.

## APPENDIX

Detailed tax burden charts, with numbered charts showing tax effort percentages and lettered charts showing taxes per $\$ 1,000$ or per person as follows:

| Alphabetical - by State | I - XIV |
| :--- | :--- |
| Income Based | I - VII |
| Population Based | VIII - XIV |
| High to Low Tax Effort - by State | A - N |
| Income Based | A - F, M |
| Population Based | G - L, N |
| Per Capita Income |  |
| Income Based | O |
| Population Based | Specific tax types are found in the following charts in the Appendix: |

| Property | I, VIII, <br> A, G |
| :--- | :--- |
| Sales | II, IX, <br> B, H |
| Individual Income | III, X, <br> C, I(alpha) |
| Corporate Income | IV, XI, <br> D, J |
| Combined Income | V, XII, <br> E, K |
| Motor Vehicle | VI, XIII, F, L |
| Overall | VII, XIV, M, N |

# TAX BURDEN IN IDAHO AND THE UNITED STATES FISCAL YEAR 2020 

## IDAHO TAX REVENUE SYSTEM - SUMMARY

Idaho state and local tax collections indicate low overall taxes when considering the amount of revenue collected in comparison to population and income across all tax types. Based on personal income, Idaho ranks $36^{\text {th }}$ nationally, and $8^{\text {th }}$ among the western states, both of which indicate lower overall taxes than most states. Idaho is also in a unique position, relying on three major tax types (income, sales, and property), which is unlike most of the surrounding states, (except Utah) that only rely on two major tax types. As with the previous fiscal year, Idaho remains $18.3 \%$ below the U.S. average when comparing per capita income, ranking $45^{\text {th }}$ out of the 50 states and the District of Columbia, and $10^{\text {th }}$ out of the 11 western states. This fiscal year, Idaho saw an increase of three rankings for the overall per capita tax burden, increasing from $48^{\text {th }}$ to $45^{\text {th }}$ nationally, and an increase from $42^{\text {nd }}$ to $36^{\text {th }}$ in regard to the income-based tax burden from the previous fiscal year.

Historically, Idaho has relied more on motor vehicle and income taxes than property and sales taxes on a regional and national basis. However, in this fiscal year, sales tax rankings increased from $26^{\text {th }}$ to $19^{\text {th }}$, showing a possible increase in the dependence on sales tax based on income. The per capita sales tax remains consistent, however, with only a one-rank increase from $34^{\text {th }}$ to $33^{\mathrm{rd}}$.

A comparison of FY 2019 and FY 2020 Idaho tax burden is summarized in Table 1 and described as follows for our major taxes:

- Idaho's individual income tax burden jumped eight rankings over the past fiscal year, from $34^{\text {th }}$ to $26^{\text {th }}$. This may be due to the increase in tax utilization, which rose from $83.8 \%$ to $98.9 \%$, or $\$ 322$ million underutilization to only $\$ 21.5$ million. This shows that Idaho did a better job of utilizing the taxes they had collected, so as not to be over or under in the amount expected.
- The property tax burden remains well below the U.S. average and ranks $9^{\text {th }}$ among the western states. Idaho decreased only one ranking to $38^{\text {th }}$ nationally, which shows the property tax burden remained steady from FY2019 to FY2020.
- The sales tax burden for Idaho increased on the national scale, jumping from $26^{\text {th }}$ to $19^{\text {th }}$ in the rankings, and the difference between the U.S. average and Idaho increased from $0.6 \%$ to $5 \%$. This is the highest Idaho's sales tax burden has been since FY 2008, when it was also ranked at $19^{\text {th }}$ nationally.
- The corporate income tax burden is highly volatile due mostly to variations in corporate taxable income. Based on income, corporate income tax collections decreased faster than the U.S. average, and the difference between the U.S. average and Idaho decreased by approximately $8 \%$ in FY 2020.
- Idaho has a higher-than-average motor vehicle tax burden, ranking $6^{\text {th }}$ in the nation and $2^{\text {nd }}$ in the western states. This tax burden includes motor vehicle licenses and registration fees, as well as fuel taxes. However, Idaho did see a slight decrease in the average tax burden for motor vehicles, dropping from $60.9 \%$ over the U.S. average in FY 2019 to $55.3 \%$ over the U.S. average in FY 2020. Comparisons between states are difficult for these taxes because some states require motor vehicles to pay personal property tax, in which case the amounts would be included in the property tax category. Idaho's motor vehicle registration fees are in lieu of property tax and tend to inflate the apparent relative level of Idaho motor vehicle taxes.

Overall state and local taxes in Idaho increased 7.6\% in FY 2020. This is significantly higher than the national average, which remained nearly unchanged from FY 2019 to FY 2020.
However, even with this increase, Idaho still remains on the lower side in overall taxes, ranking $36^{\text {th }}$ nationally and $8^{\text {th }}$ among the western states on an income basis. On a per capita basis, Idaho ranks $45^{\text {th }}$ nationally and is the lowest in the 11 western states.

Table 1 summarizes changes in tax collections in Idaho and nationally over the most recent oneyear period.

Table 1: Change in Total Tax Collections FY 2019 - FY 2020

| Tax Type | Idaho - FY 2019/2020 <br> Percent Change | U.S. - FY 2019/2020 <br> Percent Change |
| :--- | :---: | :---: |
| Property | $6.2 \%$ | $4.0 \%$ |
| Sales | $10.3 \%$ | $2.2 \%$ |
| Individual Income | $14.7 \%$ | $-5.1 \%$ |
| Corporate Income | $-13.7 \%$ | $-7.7 \%$ |
| Motor Vehicle | $-1.3 \%$ | $-0.1 \%$ |
| Overall | $7.6 \%$ | $0.1 \%$ |

## METHODOLOGY AND LIMITATIONS:

## By: Alan Dornfest

Tax burdens throughout the nation can be compared by determining tax collections in proportion to the personal income in any given state and comparing this to the hypothetical tax generated by applying the national average tax rate to each state's income. In addition, a per capita tax burden can be determined by applying the national average per capita amount of any tax to each state's population. The result of these calculations is known as a state's tax capacity or tax potential. The tax potential amount shown represents tax that would have been collected in each state if the tax rates for that state equaled the national average rate. This then tells us where each state stands in relation to the national average in terms of tax revenue generating ability.

If a state's potential tax or tax capacity is greater than its actual tax, that state is underutilizing its tax potential relative to the average state. Similarly, a state is over-utilizing its tax potential if its actual tax collections exceed the potential determined from the average tax rate. The degree of over or under- utilization is known as tax effort, which is expressed as an index in relation to $100 \%$, the point at which no over or under-utilization is indicated.

While the tax burden study amounts are derived from overall or specific tax types relative to the same taxes in other states, the study does not reflect whether taxes in Idaho are higher or lower for selected segments of our economy. This means that it is improper to use this study to draw conclusions regarding the incidence of any tax, such as whether the tax is high or low with respect to, or falls more heavily on, high- or low-income taxpayers or small vs. large businesses.

Throughout this report, ranks are assigned with 1 equaling the highest relative taxes (or income on the per capita income chart).

Total nationwide state and local taxes for fiscal year 2020 were $\$ 1,861$ billion, up $0.1 \%$ since FY 2019. This was less than last year's $5.6 \%$ increase. Total personal income increased $4.5 \%$ to $\$ 19,236$ billion. The national average state and local tax rate decreased slightly from $10.11 \%$ in FY 2019 to $9.68 \%$ of income in FY 2020.

In 2020, total U.S. population increased by $0.3 \%$ to 331.5 million. The average overall per capita tax decreased $0.9 \%$ to $\$ 5,615$.

Tax burden studies look at the overall burden of one or more taxes on the economy using either total personal income or population as proxies of economic strength. These studies do not enable the determination of the tax incidence on any particular sector, such as wage earners or business or agricultural property. However, states that typically over-utilize most or all taxes tend to be the ones with high tax burdens, especially relative to income. In FY 2020 the greatest overall tax overutilization relative to income and to other states, was found in New York, while the greatest amount of underutilization was found in Alaska (see Chart VII for detail).

Some noteworthy changes in the past fiscal year include the District of Columbia which dropped 15 ranks in sales tax. This is likely a result of the pandemic, which closed businesses and lodging during the final quarter of fiscal year 2020. The District of Columbia also counts utilizes a different fiscal year (October-September), which may cause their data to appear differently than other states.

Connecticut saw a large jump in corporate income tax, which may be a result of the PassThrough Entity Tax (PET) that was established in Fiscal Years 2018-2019 and would have started to show during fiscal year 2020. Alaska, on the other hand, saw a steep decline, dropping 15 ranks. Corporate income tax is known to be volatile, so both states may see changes again in the coming years.

Indiana saw a jump in individual income tax, increasing 20 ranks in fiscal year 2020. No special legislation was passed regarding income tax in this year, and state representatives do not know why the ranking changed so drastically; it could be a result of so many other states changing rankings that Indiana saw a steep incline, or perhaps the personal income changed from the prior fiscal year, creating the increase since income tax is based on a percentage of income.

Significant rank changes are shown in Table 2. Chart numbers referenced are those found in the Appendix.

Table 2: Significant changes in relative tax burden rankings - FY 2019 - FY 2020

| Tax Type <br> Chart Number | Basis | State | Change in Rank |

| Individual Income Tax, Chart X | Per Capita | Income | Vermont |
| Corporate Income Tax, Chart XI | Per Capita | North Dakota | +16 |
| Motor Vehicle, Chart XIII |  | Virginia | -15 |

DISTORTING FACTORS:
By: Alan Dornfest

Each year states have one-time or atypical collections or refunds, which may be large enough to affect individual state rankings or even to distort national averages used to compute each state's tax burden. Large ranking changes can also indicate data continuity problems, reporting errors, and short-term economic or tax policy changes. For this reason, long-term patterns of taxation should be ascertained by comparing states over several years. In addition, substitution of one tax for another may make the imposed tax appear higher. This effect is most apparent in states that have not enacted sales or income taxes. However, substitution of higher vehicle registration fees for personal property taxes on vehicles can alter apparent relative tax burdens as well (see: Idaho Tax Revenue System - Summary).

FY 2020 was also the start of the global pandemic, which distorted many numbers, especially corporate income tax which is already known to be volatile.

## PRIOR REPORTS:

By: Alan Dornfest

For longitudinal analysis, all the tax information presented in this study has been analyzed under the same methodology since the fiscal year 1984 study was prepared. Prior to that time, corporate and individual income taxes were combined, but identical methodology has been employed back to FY 1980. Additional reports which contained less per capita information date back to FY 1977. Reports beginning with FY 2004 can be found on the tax commission's website at: Reports and Statistics - Idaho State Tax Commission

## SUMMARY OF IDAHO'S TAX BURDEN:

Prior to 2002, the long-term pattern in Idaho had been a relative overall tax burden slightly above the U.S. average using income-based analysis and significantly below the U.S. average on a per capita basis. Since that time, and especially since Fiscal Year 2006, as shown in the following chart, total relative tax burdens in Idaho have dipped well below the U.S. average when compared to income.

The all-time low (since FY 1977) was reached in FY 2010, followed by a slight increase in FY 2011. After three relatively level years, there was an increase in FY 2015 followed by a decrease in FY 2016. FY 2017 state and local tax burdens compared to income showed an increase to levels slightly over those noted in FY 2007, but then declined in FY 2018 and FY 2019. In FY 2020, we saw an increase to approximately the same level that we saw in FY 2018.

Our income based relative overall ranking increased from $42^{\text {nd }}$ in FY 2019 to $36^{\text {th }}$ in FY 2020. Idaho's per capita overall ranking increased from $48^{\text {th }}$ in FY 2019 to $45^{\text {th }}$ in FY 2020.

The overall tax burden in Idaho in FY 2020 increased slightly from $\$ 85.51$ in FY 2019 to $\$ 85.90$ in FY2020 per \$1,000 of income. Overall taxes increased $8 \%$ during this period and total personal income increased $7 \%$ over the same period. Our per capita taxes increased $4 \%$, to $\$ 4,073$ for each person. National average taxes in FY 2020 were $\$ 101.06$ per $\$ 1,000$ of income ( $4.2 \%$ lower than in FY 2019) or $\$ 5,615$ for each person. Table 3 shows our tax effort and corresponding rank on a national level. An effort
of $100 \%$ would indicate taxes equal to the U.S. average effective tax rate based either on total personal income or population for a particular tax or overall.

Table 3: FY 2020 Idaho taxes in comparison to U.S. averages

|  | Based on Income |  | Based on Population |  |
| :--- | :---: | :---: | :---: | :---: |
| Type of Tax | Tax Effort | Rank* | Tax Effort | Rank* |
| Property | $76.4 \%$ | 38 | $62.5 \%$ | 40 |
| Sales | $105 \%$ | 19 | $85.8 \%$ | 33 |
| Individual Income | $98.9 \%$ | 26 | $80.8 \%$ | 31 |
| Corporate Income | $89.1 \%$ | 27 | $72.8 \%$ | 29 |
| Motor Vehicle | $155.3 \%$ | 6 |  |  |
|  |  |  | $126.9 \%$ | 10 |
| Overall |  |  |  |  |

*Note: Lower ranks equal higher taxes, with 1 being the highest.

Between FY 2019 and FY 2020, per capita income in Idaho increased 7.1\%, while the national average per capita income increased $4.5 \%$. Idaho per capita income remains low at $18.3 \%$ below the U.S. average, with our national rank dropping one rank to $45^{\text {th }}$.

Table 4 compares Idaho's tax and income ranks for the most recent five years and shows how many states utilize each tax (the District of Columbia is considered a "state" for the purposes of this chart and all rankings in this report).

Table 4: Relative income and tax ranks for Idaho since FY 2016

|  | Income Basis for Rank |  |  |  |  | Population Basis for Rank |  |  |  |  |  |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Type of <br> Tax | Number <br> of States | FY <br> $\mathbf{2 0 1 6}$ | FY <br> $\mathbf{2 0 1 7}$ | FY <br> $\mathbf{2 0 1 8}$ | FY <br> $\mathbf{2 0 1 9}$ | FY <br> $\mathbf{2 0 2 0}$ | FY <br> $\mathbf{2 0 1 6}$ | FY <br> $\mathbf{2 0 1 7}$ | FY <br> $\mathbf{2 0 1 8}$ | FY <br> $\mathbf{2 0 1 9}$ | FY <br> $\mathbf{2 0 2 0}$ |
| Property | 51 | 38 | 37 | 37 | 37 | 38 | 42 | 39 | 41 | 40 | 40 |
| Sales | 47 | 25 | 26 | 23 | 26 | 19 | 34 | 35 | 33 | 34 | 33 |
| Individual <br> Income | 44 | 30 | 25 | 25 | 34 | 26 | 33 | 31 | 32 | 34 | 31 |
| Corporate <br> Income | 47 | 24 | 19 | 18 | 21 | 27 | 29 | 26 | 26 | 29 | 29 |
| Motor <br> Vehicle | 51 | 3 | 2 | 5 | 5 | 6 | 7 | 8 | 9 | 10 | 10 |
| Overall | 51 | 38 | 35 | 37 | 42 | 36 | 46 | 44 | 45 | 48 | 45 |
| Per Capita <br> Income | 51 | 44 | 45 | 44 | 44 | 45 | XX | XX | XX | XX | XX |

Graphically, Idaho's income-based relative tax burden can be viewed as follows:

*Rank of $1=$ highest tax based on taxes per $\$$ of income
On a per capita (population) basis, our relative tax burden can be viewed using the following chart:

*Rank of $1=$ highest tax based on taxes per person
*The charts found on the following four pages indicate the results of income and population-based comparisons both regionally and nationally. The first two charts show only ranks, while the final two indicate effective tax rates or amounts.
