

PROPERTY TAX REDUCTION (Circuit Breaker) STATISTICS
2018

Introduction:

This is an annually updated report which traces the history of the Idaho property tax reduction program, commonly known as the "Circuit Breaker" program. This report also includes current program statistics and charts.

Key Recent Program Trends:

Total benefits paid increased by 3.1% in 2018. With this increase, total program benefits paid were \$18.02 million, their highest amount ever. Per claimant benefits increased 2.6%. The number of approved claimants increased by 0.5%, reversing a six-year downward trend. However, benefits did not keep up with taxes and the average percent of property taxes covered has decreased from 79.6% in 2011, to 69.0% in 2017 to 65.2% in 2018. This proportion remains well below the percent of taxes paid in 2006, when per claim benefits averaged 86% of property taxes. 2006 was also the last year the maximum benefit amount was increased.

Benefit changes noted are less than the 8.1% average increase in property taxes on claimant's homes, so it is likely that most circuit breaker claimants saw an increase in the amount of tax remaining after application of benefits. The median income of the average claimant increased slightly from \$16,427 in the 2017 program to \$16,657 in 2018.

In 2018, 51.6% of all claimants had all property taxes on their homesteads paid by this program. This percentage was down from 56.4% in 2017 and has continued to fall from the recent peak of 73% in 2007.

History and General Program Information:

Idaho's circuit breaker program provides reduced property taxes to elderly, disabled, and widowed taxpayers. The state replaces local government property tax revenue that otherwise would be lost because of the tax reduction allowance.

The circuit breaker program began in 1974, evolving from a previously existing widow's exemption. In its first year, 15,932 circuit breaker claims were submitted and 15,924 were approved for benefits totaling \$1.87 million, of which \$1.5 million was paid by the state, with the remainder paid by counties.

The following table describes program participation changes in general terms.

Circuit Breaker Historical Participation Patterns

<u>Year</u>	<u>General Trend</u>	<u>Discussion</u>
1975 and 1977	Large decreases	Initial year claimants fail to reapply. Maximum income not responsive to inflation.
1978	Large increase	Maximum income and maximum benefit increased.
1981	Large increase	Disabled persons now eligible for benefits.
1982-1986	Level	No major program changes.
1987-1988	Large increase	Increased emphasis on awareness.
1989-1992	Slight increase	
1993-1995	Moderate increase	Maximum benefit increased substantially.
1996-2001	Level to slightly decreasing	Maximum benefit increased substantially then level since 1999.
2002	Slight increase	
2003	Large increase	
2004-2005	Slight increase	
2006	Large increase	Maximum benefits and income ceiling increased through legislation.
2007 - 2008	Decrease in number of claims	Maximum benefits and income ceiling frozen.
2009 - 2011	Slight increase or flat	Maximum benefits and income ceiling remain frozen.
2012 - 2013	Decrease in number of claims	Maximum benefits and income ceiling remain frozen.
2014-2017	Slight decrease in number of claims	Maximum benefits frozen but income ceiling increased.
2018	Slight increase in number of claims	Maximum benefits frozen but income ceiling increased.

Chart I provides a chronology of major program statistics, including benefits and participation and annual changes in per claim and total benefits since program inception.

CHART I:

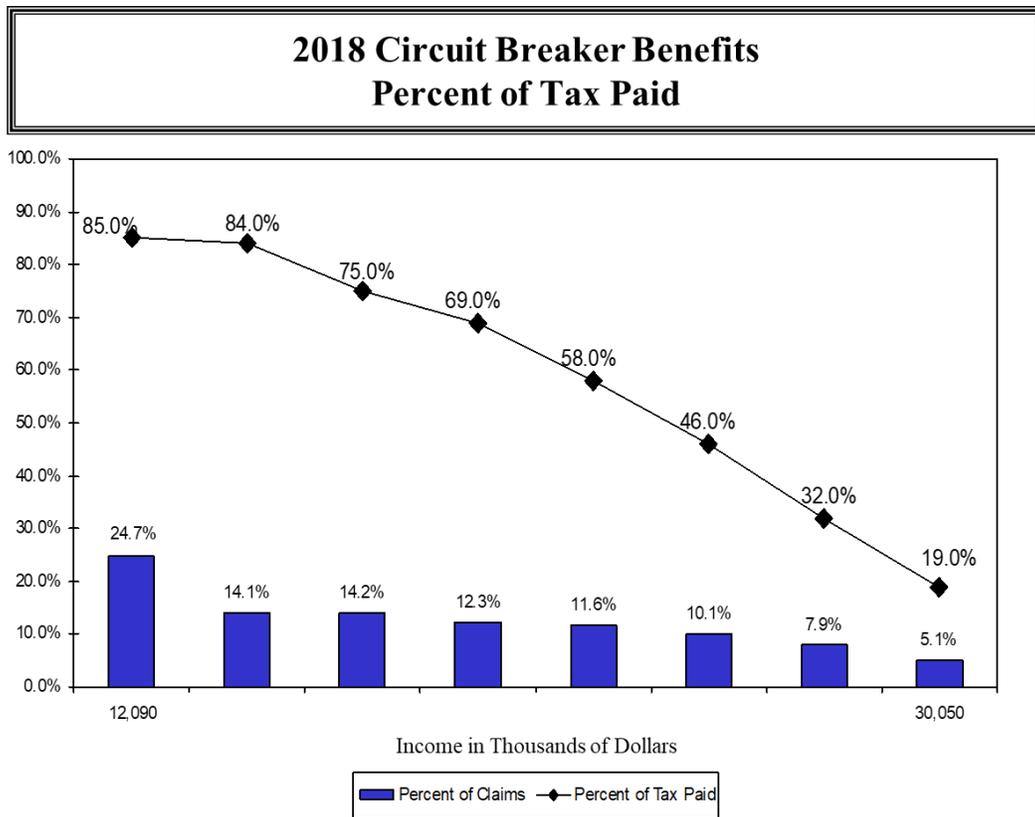

Circuit Breaker Statistics and History								
Year	Approved Claimants:		Benefits Paid and Changes in Benefits:				Eligibility:	
	Number	Percent Change from prior year	Average \$ per Claimant	Percent Change in per Claim \$	Total (\$ Millions)	Percent Change in Total Costs	Maximum Income (\$)	Maximum Benefit (\$)

2006	28,737	7.8%	534.09	-7.8%	15.35	-0.6%	28,000	1,320
2007	28,202	-1.9%	543.12	1.7%	15.32	-0.2%	28,000	1,320
2008	27,831	-1.3%	554.43	2.1%	15.43	0.7%	28,000	1,320
2009	27,920	0.3%	561.40	1.3%	15.67	1.6%	28,000	1,320
2010	28,399	1.7%	565.21	0.7%	16.05	2.4%	28,000	1,320
2011	28,479	0.3%	562.54	-0.5%	16.02	-0.2%	28,000	1,320
2012	28,426	-0.2%	557.20	-1.0%	15.84	-1.1%	28,000	1,320
2013	27,734	-2.4%	565.54	1.5%	15.68	-1.0%	28,000	1,320
2014	27,365	-1.3%	594.79	5.2%	16.27	3.8%	28,700	1,320
2015	27,270	-1.0%	607.40	2.1%	16.56	1.8%	29,100	1,320
2016	27,097	-0.6%	624.34	2.8%	16.92	2.1%	29,470	1,320
2017	26,950	-0.5%	648.74	3.9%	17.48	3.4%	29,640	1,320
2018	27,078	0.5%	665.44	2.6%	18.02	3.1%	30,050	1,320
Totals	930,565		395.65		368.18			

To put these increases in perspective, the Consumer Price Index increased by 283.6% between July 1978 and July 2018. However, inflation adjusted current program costs are only 61.4% higher than 1978 program costs. During this same period, the number of claimants increased by 71.5%. The inflation adjusted benefit per claimant is equivalent to 94.1% of the 1978 amount.

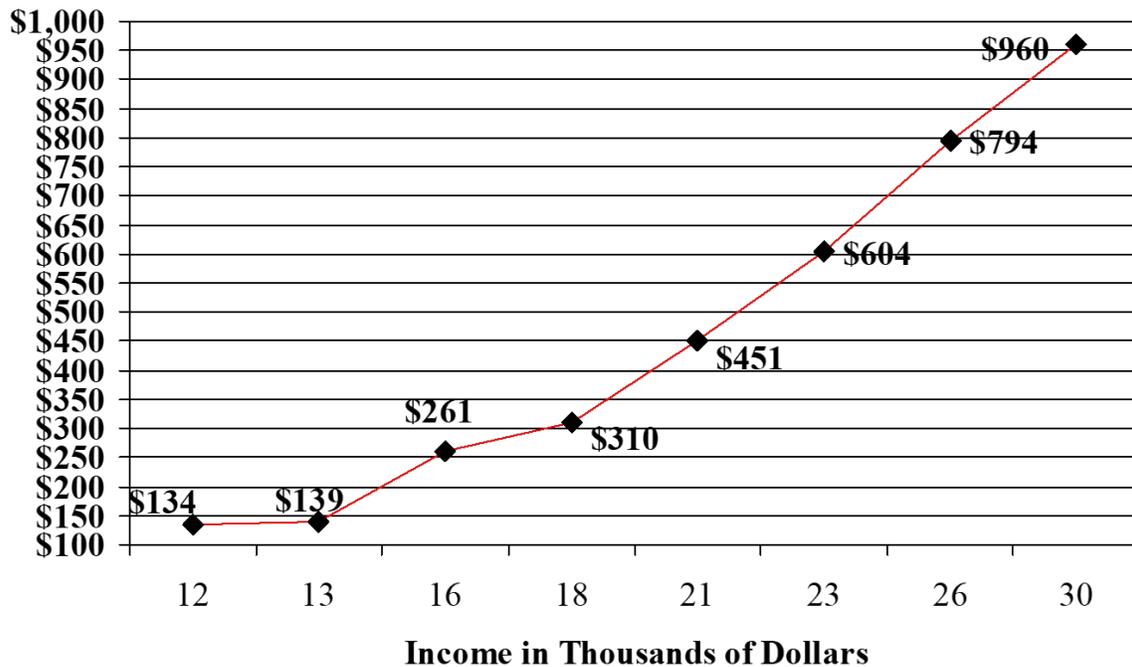

Benefits have been fully state funded through a continuous appropriation from the sales tax account since 1987, and in all but the following years:

- 1974: State paid \$1.5 million, which represented 80% of total approved benefits;
- 1982: State paid \$2.93 million or 90.9%;
- 1983: State paid \$2.799 million or 89.5% in Dec. 1983, with remainder paid in April 1984 after supplemental appropriation;
- 1984: State paid \$2.935 million or 93.0%;
- 1985: State paid \$3.106 million or 94.9%;
- 1986: State paid \$3.186 million or 90.6%.

The following charts demonstrate 2018 circuit breaker benefits and remaining taxes for claimants at various income levels:

2018 Circuit Breaker Benefits Average Taxes Owing after Benefits

The typical claimant in 2018 had income of about \$16,657, while average per claimant property taxes were about \$1009 (an 8.1% increase since 2017), of which circuit breaker benefits typically cover all but \$351 (35%). For claimants with incomes greater than the median, there is a sharp drop off in the percent of taxes paid by the program.

The charts attached to this report include detailed 2018 statistics and show changes in benefits since the early years of the circuit breaker program. The impact of doubling maximum individual benefits in 1978 and increasing these benefits by another 50% in 1992, 33% in 1993, 12.5% in 1996, 11.1% in 1997, 10% in 1998, 9% in 1999, and 10% in 2006 is readily apparent on several of these charts. Prior to 2006, maximum benefits had not changed in several years. The effect of other major program changes is described in the following sections.

Cost of Living Adjustments:

From 1982 through 2006, factors were applied annually (except 1983-1984) to adjust income brackets so that claimants were not penalized by inflation compensation paid by Social Security. This principle changed as a result of legislation in 2006 that raised the income ceiling but tied future increases to a formula based on federal poverty guidelines. The income ceiling exceeded these guidelines until 2014, so, between 2006 and 2013 there were no income ceiling adjustments. Poverty guidelines have been updated and program income limits increased each year beginning in 2014.

By grouping 2018 applicants according to income, it is evident that the vast majority of applicants are in the lowest income brackets.

2018 Claimants by Income Bracket Based on Income Received in 2017				
Income Bracket at Least:	Up to:	Number of Claims	% of Claims	Cumulative % of Claims
-	12,090	6,691	24.7%	24.7%
12,091	14,630	3,807	14.1%	38.8%
14,631	17,210	3,870	14.3%	53.1%
17,211	19,770	3,327	12.3%	65.3%
19,771	22,330	3,147	11.6%	77.0%
22,331	24,900	2,731	10.1%	87.1%
24,901	27,470	2,130	7.9%	94.9%
27,471	30,050	1,375	5.1%	100.0%
Total:		27,078	100.0%	

Medical Expense Deduction:

The average medical expense deduction increased slightly between 2017 and 2018 and is \$3,533 currently. This year 82% of all applicants utilized this provision. Since applicants typically receive about 71% of the maximum benefits for which they are eligible, this deduction translates into about \$163 per claim or \$4.4 million in overall benefits. Allowance of this deduction, therefore, increases program costs by about 32.5%.

Allowance of Benefits for Widows and Disabled Persons:

The vast majority of all program beneficiaries are senior citizens over age 65. Categorization of all applicants follows:

Claimants by Type of Eligibility - 2018		
01/31/19		
Status	Number of Claims	% of Claims
Over age 65	22,879	84.5%
Younger Widows	761	2.8%
Younger Widowers	65	0.2%
10 + SC VA Disabled	309	1.1%
Non-SC VA Disabled	13	0.0%
Social Security Disabled	2,671	9.9%
Other & Multiple	380	1.4%
Total:	27,078	100.0%

The proportion of claimants in each of the eligibility status categories shown in the above table has not changed appreciably in several years.

State Audit of Claims:

In its annual audit of applications, the tax commission attempts to determine the validity of all claims submitted. Since the inception of this audit process in 1977, net savings of \$7,432,089 (including re-audit collections) have been realized. Direct net audit savings related to 2018 claims decreased about 10% in 2018 to \$392,704. This was supplemented by re-audit of prior year claims using additional data not originally available, resulting in additional collections on deficiency notices in the amount of \$166,347. So, total audit program savings was \$559,051 during 2018. In addition, many claims, upon review, were found to be eligible for increased benefits. \$138,440 was paid to satisfy such increases, also identified during the review process. In the past six years, beginning with 2012, the audit program has resulted in many applications being reapproved. Prior to that time, most disapproved claims were not submitted to the state for review. New law implemented during 2012 changed this procedure.
