

PROPERTY TAX REDUCTION (Circuit Breaker) STATISTICS 2019

Introduction:

This is an annually updated report which traces the history of the Idaho property tax reduction program, commonly known as the "Circuit Breaker" or PTR program. This report includes current program statistics and charts. In 2019 a 100% Service Connected Disabled Veterans Property Tax Benefit program was added and PTR was expanded to include newly constructed homes (subject to Occupancy tax) not on the property tax rolls. Statistics are included for the Veterans Program but to date no statistics are available for the "Occupancy" applications.

Key Recent Program Trends:

Total benefits paid increased by 8.0% in 2019. With this increase, total program benefits paid were \$19.46 million, their highest amount ever. Much of this increase was due to the additional benefits granted to veterans with 100% service-connected disabilities. The following table summarizes participation and benefit changes in the ongoing and new portions of the property tax reduction program.

| Year | Original PTR Program | | | New Disabled Veterans Program | | |
|----------------|----------------------|-----------------------------------|--------------------------------|-------------------------------|-----------------------------------|---------------------------------|
| | Number of claims | Total Benefits Paid (\$ millions) | Average Benefit per Claim (\$) | Number of claims | Total Benefits Paid (\$ millions) | Average Benefit per claim (\$)* |
| 2018 | 27078 | 18.02 | 665 | NA | NA | NA |
| 2019 | 26774 | 18.33 | 685 | 1103** | 1.13 | 1,026 |
| Percent Change | -1.1% | +1.7% | +3.0% | NA | NA | NA |

* Benefits shown for the Veterans Program do not include any benefits paid to veterans through the original PTR program.

**Includes 302 claimants who received benefits under the new disabled veterans program *and* received benefits from the original PTR program. The 302 claimants are also included in the 26,774 claims shown for the original program.

In total, the combined programs benefited 27,575 claimant households in 2019.

Including the new Disabled Veterans program, the total number of claims increased by 1.8%. However, excluding the new veterans program, the number of approved PTR claimants decreased by 1.1% but per claimant benefits increased 3.0%. Benefits for PTR claimants did not keep up with taxes as the average percent of property taxes covered decreased from 79.6% in 2011, to 65.2% in 2018, to 60.0% in 2019. This proportion remains well below the percent of taxes paid in 2006, when per claim benefits averaged 86% of property taxes. 2006 as the last year the maximum benefit amount was increased.

Benefit changes noted are less than the 13.3% average increase in property taxes on claimant's homes, so it is likely that most circuit breaker claimants saw an increase in the amount of tax remaining after application of benefits. The median income of the average claimant increased from \$16,657 in the 2018 program to \$16,974 in 2019.

In 2019, 46.0% of all claimants had all property taxes on their homesteads paid by this program. This percentage was down from 51.6% in 2018 and has continued to fall from the recent peak of 73% in 2007.

History and General Program Information:

Idaho's circuit breaker program provides reduced property taxes to elderly, disabled, and widowed taxpayers. The state replaces local government property tax revenue that otherwise would be lost because of the tax reduction allowance.

The circuit breaker program began in 1974, evolving from a previously existing widow's exemption. In its first year, 15,932 circuit breaker claims were submitted and 15,924 were approved for benefits totaling \$1.87 million, of which \$1.5 million was paid by the state, with the remainder paid by counties.

The following table describes program participation changes in general terms.

The dual maximum benefit shown for 2019 reflects the additional benefit that could be allowed for 100%

service-connected disabled veterans.

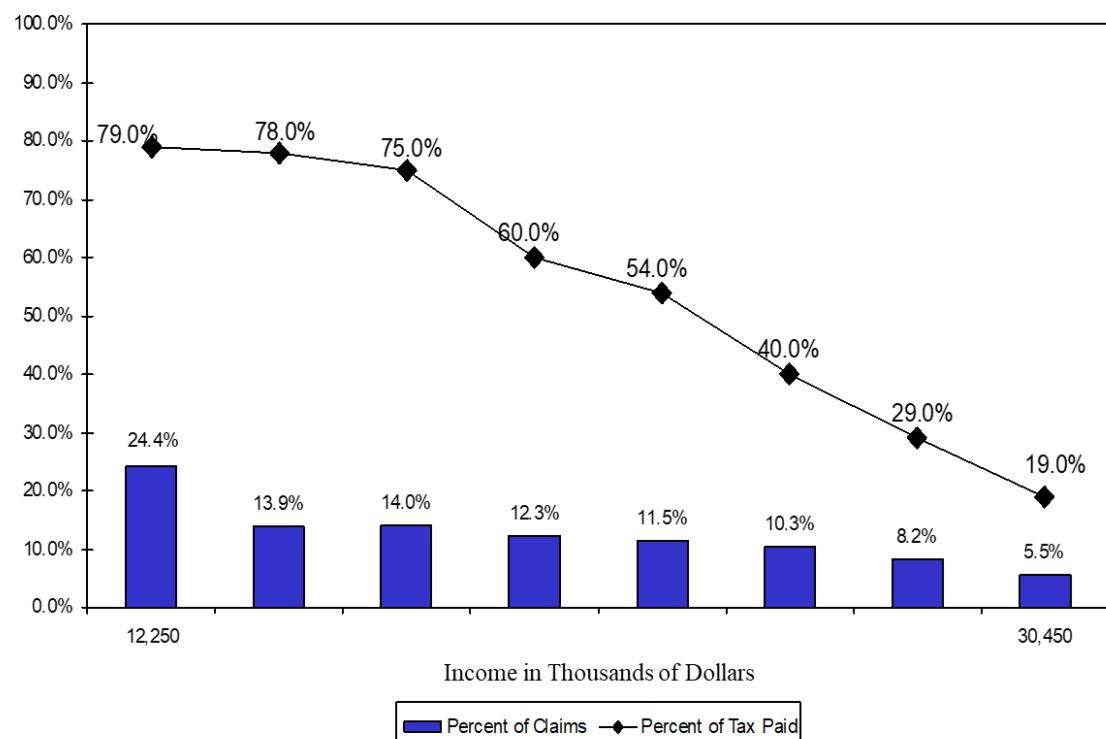

To put these increases in perspective, the Consumer Price Index increased by 290.5% between July 1978 and July 2019. However, inflation adjusted current program costs are only 71.2% higher than 1978 program costs. During this same period, the number of claimants increased by 74.7%. The inflation adjusted benefit per claimant is equivalent to 98.1% of the 1978 amount. The figures used for 2019 reflect the additional benefits paid under the new disabled veteran's program as well as the amounts paid under the original program.

Benefits have been fully state funded through a continuous appropriation from the sales tax account since 1987, and in all but the following years:

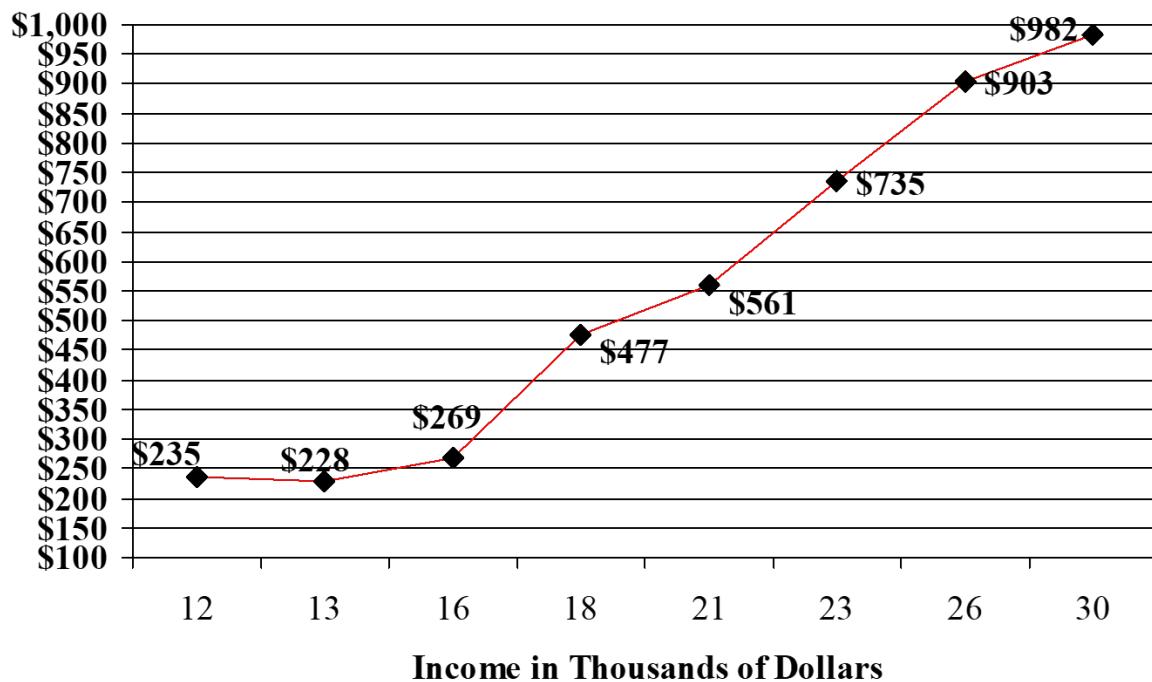

- 1974: State paid \$1.5 million, which represented 80% of total approved benefits;
- 1982: State paid \$2.93 million or 90.9%;
- 1983: State paid \$2.799 million or 89.5% in Dec. 1983, with remainder paid in April 1984 after supplemental appropriation;
- 1984: State paid \$2.935 million or 93.0%;
- 1985: State paid \$3.106 million or 94.9%;
- 1986: State paid \$3.186 million or 90.6%.

The following charts demonstrate 2019 circuit breaker benefits and remaining taxes for claimants at various income levels:

2019 Circuit Breaker Benefits Percent of Tax Paid

2019 Circuit Breaker Benefits Average Taxes Owing after Benefits

The typical claimant in 2019 had income of about \$16,974, while average per claimant property taxes were about \$1144 (a 13.3% increase since 2018), of which circuit breaker benefits typically cover all but \$458 (40%). For claimants with incomes greater than the median, there is a sharp drop off in the percent of taxes paid by the program.

The charts attached to this report include detailed 2019 statistics and show changes in benefits since the early years of the circuit breaker program. The impact of doubling maximum individual benefits in 1978 and increasing these benefits by another 50% in 1992, 33% in 1993, 12.5% in 1996, 11.1% in 1997, 10% in 1998, 9% in 1999, and 10% in 2006 is readily apparent on several of these charts. Prior to 2006, maximum benefits had not changed in several years. The effect of other major program changes is described in the following sections.

Cost of Living Adjustments:

From 1982 through 2006, factors were applied annually (except 1983-1984) to adjust income brackets so that claimants were not penalized by inflation compensation paid by Social Security. This principle changed as a result of legislation in 2006 that raised the income ceiling but tied future increases to a formula based on federal poverty guidelines. The income ceiling exceeded these guidelines until 2014, so, between 2006 and 2013 there were no income ceiling adjustments. Poverty guidelines have been updated and program income limits increased each year beginning in 2014.

By grouping 2019 applicants according to income, it is evident that the vast majority of applicants are in the lowest income brackets.

| 2019 Claimants by Income Bracket Based on Income Received in 2018 | | | | |
|--|--------|------------------|-------------|------------------------|
| Income Bracket at Least: | Up to: | Number of Claims | % of Claims | Cumulative % of Claims |
| - | 12,090 | 6,540 | 24.4% | 24.4% |
| 12,091 | 14,630 | 3,717 | 13.9% | 38.3% |
| 14,631 | 17,210 | 3,750 | 14.0% | 52.3% |
| 17,211 | 19,770 | 3,282 | 12.3% | 64.6% |
| 19,771 | 22,330 | 3,081 | 11.5% | 76.1% |
| 22,331 | 24,900 | 2,756 | 10.3% | 86.4% |
| 24,901 | 27,470 | 2,184 | 8.2% | 94.5% |
| 27,471 | 30,050 | 1,464 | 5.5% | 100.0% |
| Total: | | 26,774 | 100.0% | |

Medical Expense Deduction:

The average medical expense deduction increased slightly between 2017 and 2018 and is \$3,755 currently. This year 82.9% of all applicants utilized this provision. Since applicants typically receive about 73% of the maximum benefits for which they are eligible, this deduction translates into about \$168 per claim or \$4.5 million in overall benefits. Allowance of this deduction, therefore, increases program costs by about 30%.

Allowance of Benefits for Widows and Disabled Persons:

The vast majority of all program beneficiaries are senior citizens over age 65. Categorization of all applicants follows:

| Claimants by Type of Eligibility - 2019 | | |
|---|------------------|-------------|
| 02/04/20 | | |
| Status | Number of Claims | % of Claims |
| Over age 65 | 22,676 | 84.7% |
| Younger Widows | 728 | 2.7% |
| Younger Widowers | 65 | 0.2% |
| 10 + SC VA Disabled | 332 | 1.2% |
| Non-SC VA Disabled | 9 | 0.0% |
| Social Security Disabled | 2,577 | 9.6% |
| Other & Multiple | 387 | 1.4% |
| Total: | 26,774 | 100.0% |

The proportion of claimants in each of the eligibility status categories shown in the above table has not changed appreciably in several years.

State Audit of Claims:

In its annual audit of applications, the tax commission attempts to determine the validity of all claims submitted. Since the inception of this audit process in 1977, net savings of \$8,011,304 (including re-audit collections) have been realized. Direct net audit savings related to 2018 claims increased 26% in 2019 to \$496,055. This was supplemented by re-audit of prior year claims using additional data not originally available, resulting in additional collections on deficiency notices in the amount of \$83,160. So, total audit program savings were \$579,215 during 2019. In addition, many claims, upon review, were found to be eligible for increased benefits. \$130,271 was paid to satisfy such increases, also identified during the review process.

This year's audit savings includes a significant number of claims that were denied as not qualifying under the provisions of the new disabled veterans program.
