

CIRCUIT BREAKER STATISTICS THROUGH 2016

Introduction:

This is an annually updated report which traces the history of the Idaho property tax reduction program, commonly known as the "Circuit Breaker" program. This report also includes current program statistics and charts.

Key Recent Program Trends:

Total benefits paid increased by 2.14% in 2016. With this increase, total program benefits paid were \$16.92 million, their highest amount ever. Per claimant benefits increased 2.8%. However, the number of approved claimants continued to slide, decreasing 0.6% for the fifth consecutive decrease in participation. In addition, there has been a continuing erosion of the average percent of property taxes covered, from 79.6% in 2011, to 70.5% in 2016. This proportion remains well below the percent of taxes paid in 2006, when per claim benefits averaged 86% of property taxes. 2006 was also the last year the maximum benefit amount was increased.

Benefit changes noted are less than the 6.7% average increase in property taxes on claimant's homes, so most circuit breaker claimants saw an increase in the proportion of tax remaining after application of benefits. The median income of the average claimant decreased slightly from \$16,306 in the 2015 program to \$16,192 in 2016.

In 2016, 57% of all claimants had all property taxes on their homesteads paid by this program. This percentage was down from 65% in 2013 and has continued to fall from the recent peak of 73% in 2007.

History and General Program Information:

Idaho's circuit breaker program provides reduced property taxes to elderly, disabled, and widowed taxpayers. The state replaces local government property tax revenue that otherwise would be lost because of the tax reduction allowance.

The circuit breaker program began in 1974, evolving from a previously existing widow's exemption. In its first year, 15,932 circuit breaker claims were submitted and 15,924 were approved for benefits totaling \$1.87 million, of which \$1.5 million was paid by the state, with the remainder paid by counties.

The following table describes program participation changes in general terms.

Circuit Breaker Historical Participation Patterns

<u>Year</u>	<u>General Trend</u>	<u>Discussion</u>
1975 and 1977	Large decreases	Initial year claimants fail to reapply. Maximum income not responsive to inflation.
1978	Large increase	Maximum income and maximum benefit increased.
1981	Large increase	Disabled persons now eligible for benefits.
1982-1986	Level	No major program changes.
1987-1988	Large increase	Increased emphasis on awareness.
1989-1992	Slight increase	
1993-1995	Moderate increase	Maximum benefit increased substantially.
1996-2001	Level to slightly decreasing	Maximum benefit increased substantially then level since 1999.
2002	Slight increase	
2003	Large increase	
2004-2005	Slight increase	
2006	Large increase	Maximum benefits and income ceiling increased through legislation.
2007 - 2008	Decrease in number of claims	Maximum benefits and income ceiling frozen.
2009 - 2011	Slight increase or flat	Maximum benefits and income ceiling remain frozen.
2012 – 2013	Decrease in number of claims	Maximum benefits and income ceiling remain frozen.
2014-2016	Slight decrease in number of claims	Maximum benefits frozen but income ceiling increased.

Chart I provides a chronology of major program statistics, including benefits and participation and annual changes in per claim and total benefits since program inception.

Totals	930,565		395.65		368.18			

To put these increases in perspective, the Consumer Price Index increased by 266.3% between July 1978 and July 2016. However, inflation adjusted current program costs are only 58.8% higher than 1978 program costs. During this same period, the number of claimants increased by 71.7%. The inflation adjusted benefit per claimant is equivalent to 92.5% of the 1978 amount.

Benefits have been fully state funded through a continuous appropriation from the sales tax account since 1987, and in all but the following years:

- 1974: State paid \$1.5 million, which represented 80% of total approved benefits;
- 1982: State paid \$2.93 million or 90.9%;
- 1983: State paid \$2.799 million or 89.5% in Dec. 1983, with remainder paid in April 1984 after supplemental appropriation;
- 1984: State paid \$2.935 million or 93.0%;
- 1985: State paid \$3.106 million or 94.9%;
- 1986: State paid \$3.186 million or 90.6%.

The following charts demonstrate 2016 circuit breaker benefits and remaining taxes for claimants at various income levels:

2016 Circuit Breaker Benefits Average Taxes Owing after Benefits

The typical claimant in 2016 had income of about \$16,192, while average per claimant property taxes were about \$877 (a 6.7% increase since 2015), of which circuit breaker benefits typically cover all but \$258 (29%). For claimants with incomes greater than the median, there is a sharp drop off in the percent of taxes paid by the program.

The charts attached to this report include detailed 2016 statistics and show changes in benefits since the early years of the circuit breaker program. The impact of doubling maximum individual benefits in 1978 and increasing these benefits by another 50% in 1992, 33% in 1993, 12.5% in 1996, 11.1% in 1997, 10% in 1998, 9% in 1999, and 10% in 2006 is readily apparent on several of these charts. Prior to 2006, maximum benefits had not changed in several years. The effect of other major program changes is described in the following sections.

Cost of Living Adjustments:

From 1982 through 2006, factors were applied annually (except 1983-1984) to adjust income brackets so that claimants were not penalized by inflation compensation paid by Social Security. This principle changed as a result of legislation in 2006 that raised the income ceiling, but tied future increases to a formula based on federal poverty guidelines. The income ceiling exceeded these guidelines until 2014, so, between 2006 and 2013 there were no income ceiling adjustments. Poverty guidelines have been updated and 2014 and 2015 program income limits increased. Higher income limits will again be implemented in 2017.

By grouping 2016 applicants according to income, it is evident that the vast majority of applicants are in the lowest income brackets.

2016 Claimants by Income Bracket Based on Income Received in 2015				
Income Bracket at Least:	Up to:	Number of Claims	% of Claims	Cumulative % of Claims
-	11,860	6,616	24.4%	24.4%
11,861	14,360	3,735	13.8%	38.2%
14,361	16,890	3,948	14.6%	52.8%
16,891	19,400	3,430	12.7%	65.4%
19,401	21,920	3,085	11.4%	76.8%
21,921	24,430	2,700	10.0%	86.8%
24,431	26,940	2,135	7.9%	94.7%
26,941	29,470	1,448	5.3%	100.0%
Total:		27,097	100.0%	

Medical Expense Deduction:

The average medical expense deduction was essentially unchanged between 2014 and 2015, and is \$3,551 currently. This year 83.2% of all applicants utilized this provision. Since applicants typically receive about 67% of the maximum benefits for which they are eligible, this deduction translates into about \$154 per claim or \$4.2 million in overall benefits. Allowance of this deduction, therefore, increases program costs by about 33%.

Allowance of Benefits for Widows and Disabled Persons:

The vast majority of all program beneficiaries are senior citizens over age 65. Categorization of all applicants follows:

Claimants by Type of Eligibility - 2016		
02/01/17		
Status	Number of Claims	% of Claims
Over age 65	22,675	83.7%
Younger Widows	785	2.9%
Younger Widowers	68	0.3%
10 + SC VA Disabled	285	1.1%
Non-SC VA Disabled	19	0.1%
Social Security Disabled	2,874	10.6%
Other & Multiple	391	1.4%
Total:	27,097	100.0%

The proportion of claimants in each of the eligibility status categories shown in the above table has not changed appreciably in several years.

State Audit of Claims:

In its annual audit of applications, the tax commission attempts to determine the validity of all claims submitted. Since the inception of this audit process in 1977, net savings of \$7,257,812 (including re-audit collections) have been realized. Direct net audit savings related to 2016 claims increased about 2.3% in 2016 to \$373,198. This was supplemented by re-audit of prior year claims using additional data not originally available, resulting in additional collections on deficiency notices in the amount of \$102,307. So, total audit program savings was \$475,505 during 2016. In the past four years, beginning with 2012, the audit program has resulted in many applications being reapproved. Prior to that time, most disapproved claims were not submitted to the state for review. New law implemented during 2012 changed this procedure.
