

## PROPERTY TAX REDUCTION (Circuit Breaker) STATISTICS 2022

### Introduction:

This is an annually updated report which traces the history of the Idaho property tax reduction program, commonly known as the "Circuit Breaker" or PTR program. This report includes current program statistics and charts. Statistics are included for the Veteran's and Occupancy Tax programs as well as the original PTR program.

### Key Recent Program Trends:

Total benefits paid by the original PTR program (prior to the additional veteran's benefit and occupancy tax programs which began in 2019) decreased 0.7%. Total benefits from all programs increased 16.2% in 2021 but decreased 2.1% in 2022. HB389, passed in 2020, added a value cap to the PTR program. This was amended in 2021 and implemented for the first time in 2022. This limit removed just over 800 claimants from the program. Average taxes were up 10.9%, while average benefits were up 2.5% for claimants in the original PTR program. This matches general property tax increases in 2022. The following table summarizes participation and benefit changes in the ongoing and major new portions of the property tax reduction program for the last three years.

Year	Original PTR Program			Disabled Veterans Program		
	Number of claims	Total Benefits Paid (\$ millions)	Average Benefit per Claim (\$)	Number of claims	Total Benefits Paid (\$ millions)	Average Benefit per claim (\$)*

Percent change 2021-2022	-4.12%	-0.7%	+0.3%	+18.2%	+23.7%	+4.7%

\* Includes 569 claimants also receiving benefit under original PTR program.

\*\* Includes 501 claimants also receiving benefit under the original PTR program.

\*\*\*Includes 683 claimants also receiving benefit under the original PTR program.

In addition to the amounts shown in the above table, the following amounts were paid as credits on occupancy taxes: 2020: \$51,325, 2021: \$37,422, 2022: \$27,777.

In total, the combined programs benefited 26,677 claimant households in 2022.

Including the Disabled Veterans program, the total number of claims decreased by 4.0%. Benefits for approved PTR claimants decreased from 65% in 2021 to 62% of property taxes in 2022. Notably, this

proportion remains well below the percent of taxes paid in 2006, when benefits averaged 86% of property taxes. In 2022, 46.5% of all original program claimants had all property taxes on their homesteads paid by this program. This percentage was down slightly in 2022 and remains well below its recent peak of 73% in 2007.

#### History and General Program Information:

Idaho's circuit breaker program provides reduced property taxes to elderly, disabled, and widowed taxpayers. The state replaces local government property tax revenue that otherwise would be lost because of the tax reduction allowance. The circuit breaker program began in 1974, evolving from a previously existing widow's exemption. In its first year, 15,932 circuit breaker claims were submitted and 15,924 were approved for benefits totaling \$1.87 million, of which \$1.5 million was paid by the state, with the remainder paid by counties.

The following table describes program participation changes in general terms.

#### **Circuit Breaker Historical Participation Patterns**

<u>Year</u>	<u>General Trend</u>	<u>Discussion</u>
1981	Large increase	Disabled persons now eligible for benefits.
1982-1986	Level	No major program changes.
1987-1988	Large increase	Increased emphasis on awareness.
1989-1992	Slight increase	
1993-1995	Moderate increase	Maximum benefit increased substantially.
1996-2001	Level to slightly decreasing	Maximum benefit increased substantially then level since 1999.
2002 - 2005	Slight increase	
2006	Large increase	Maximum benefits and income ceiling increased through legislation.
2007 - 2008	Decrease in number of claims	Maximum benefits and income ceiling frozen.
2009 - 2011	Slight increase or flat	Maximum benefits and income ceiling remain frozen.
2012 – 2013	Decrease in number of claims	Maximum benefits and income ceiling remain frozen.
2014-2017	Slight decrease in number of claims	Maximum benefits frozen but income ceiling increased.
2018	Slight increase in number of claims	Maximum benefits frozen but income ceiling increased.
2019 - 2020	Increase in program participation	Income ceiling increased and new disabled veterans' benefits added.
2021	Decrease in program participation despite increase in maximum benefits	Disabled veterans participation continues to increase rapidly, but original program participation is declining.
2022	Decrease in program participation and benefits	Claimants with higher value homes eliminated.

Chart I provides a chronology of major program statistics, including benefits and participation and annual changes in per claim and total benefits since 1981. 2021 and 2022 figures include the new veterans program.

<b>Totals</b>	<b>1,018,230</b>		<b>467.66</b>		<b>492.73</b>			

The dual maximum benefit beginning in 2019 reflects the additional benefit that could be allowed for 100% service-connected disabled veterans.

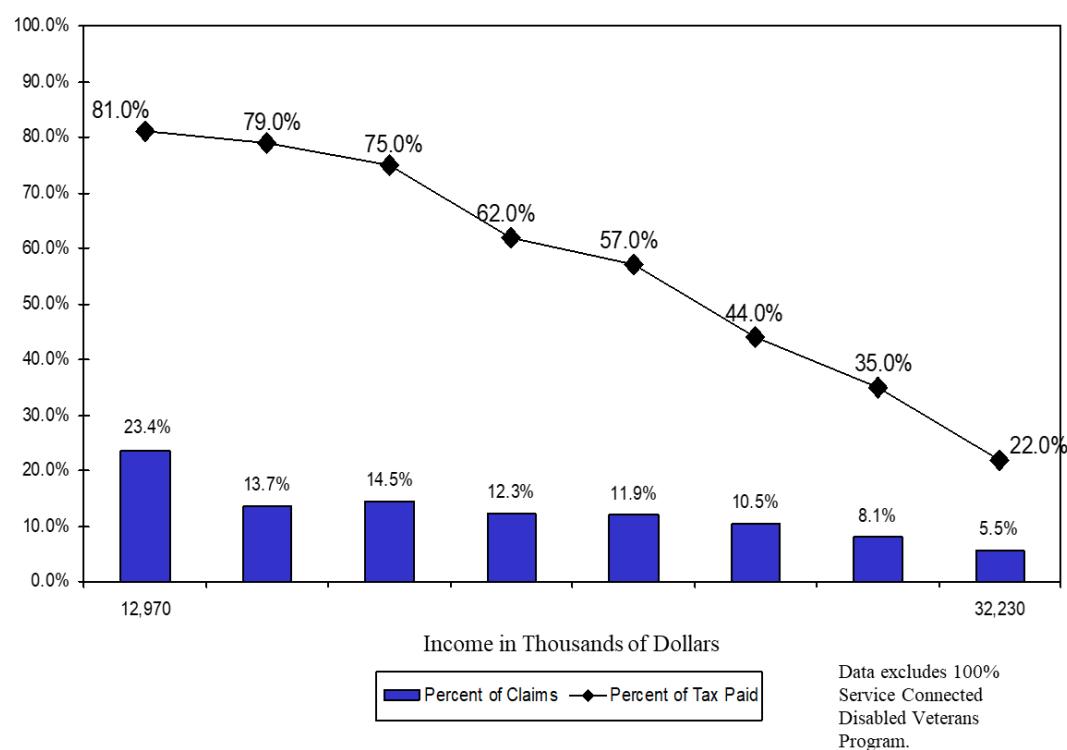

Inflation adjusted current program costs are 142% higher than 1981 program costs. During this same period, the number of claimants increased by 55.4%. The inflation adjusted benefit per claimant is equivalent to 155.8% of the 1981 amount. The figures used for 2022 reflect the additional benefits paid under the disabled veteran's program as well as the amounts paid under the original program.

Benefits have been fully state funded through a continuous appropriation from the sales tax account since 1987, and in all but the following years:

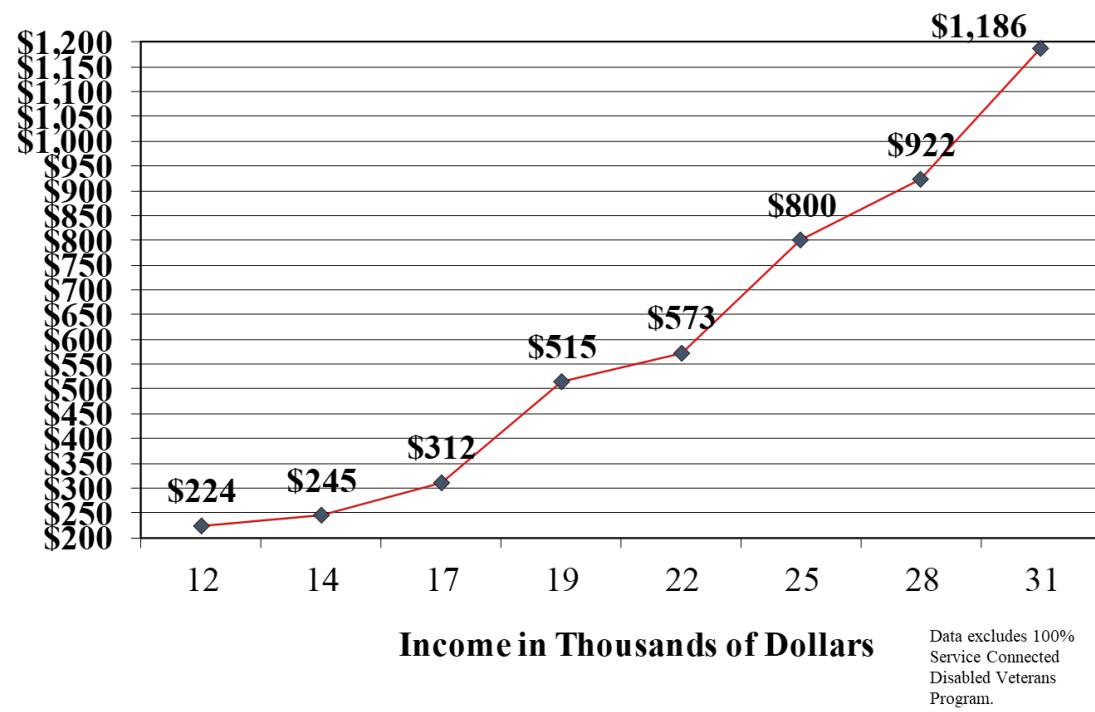

- 1974: State paid \$1.5 million, which represented 80% of total approved benefits;
- 1982: State paid \$2.93 million or 90.9%;
- 1983: State paid \$2.799 million or 89.5% in Dec. 1983, with remainder paid in April 1984 after supplemental appropriation;
- 1984: State paid \$2.935 million or 93.0%;
- 1985: State paid \$3.106 million or 94.9%;
- 1986: State paid \$3.186 million or 90.6%.

The following charts demonstrate 2022 circuit breaker benefits (excluding veterans benefits) and remaining taxes for claimants at various income levels:

## 2022 Property Tax Reduction Benefits Percent of Tax Paid

## 2022 Property Tax Reduction Benefits Average Taxes Owing after Benefits

The typical claimant in 2022 had income of about \$18,403, while average per claimant property taxes were about \$1,287 (a 3.7% increase since 2021), of which circuit breaker benefits typically cover all but \$484 (38%). For claimants with incomes greater than the median, there is a sharp drop off in the percent of taxes paid by the program.

The charts attached to this report include detailed 2022 statistics and show changes in benefits since the early years of the circuit breaker program.

Cost of Living Adjustments:

From 1982 through 2006, factors were applied annually (except 1983-1984) to adjust income brackets so that claimants were not penalized by inflation compensation paid by Social Security. This principle changed because of legislation in 2006 that raised the income ceiling but tied future increases to a formula based on federal poverty guidelines. The income ceiling exceeded these guidelines until 2014, so, between 2006 and 2013 there were no income ceiling adjustments. Poverty guidelines have been updated and program income limits increased each year beginning in 2014.

By grouping 2022 applicants according to income, it is evident that the vast majority of applicants are in the lowest income brackets.

<b>Total:</b>		<b>23,792</b>	<b>100.0%</b>	

\*Data excludes 100% Service Connected Disabled Veterans program

Medical Expense Deduction:

The average medical expense deduction increased slightly between 2021 and 2022 and is \$3,666 currently. This year 80.5% of all applicants utilized this provision. Since applicants typically receive about 79% of the maximum benefits for which they are eligible, this deduction translates into about \$182 per claim or \$4.3 million in overall benefits. Allowance of this deduction, therefore, increases program costs by about 22%.

### Allowance of Benefits for Widows and Disabled Persons:

Most of all program beneficiaries are senior citizens over age 65. Categorization of all applicants follows:

Property Tax Reduction Claimants by Type of Eligibility - 2022		
Status	Number of Claims	% of Claims
<b>Over age 65</b>	20,559	86.4%
<b>Younger Widows</b>	524	2.2%
<b>Younger Widowers</b>	54	0.2%
<b>10 + SC VA Disabled</b>	347	1.5%
<b>Non-SC VA Disabled</b>	2	0.0%
<b>Social Security Disabled</b>	1,998	8.4%
<b>Other &amp; Multiple</b>	308	1.3%
<b>Total:</b>	<b>23,792</b>	100.0%

\*Data excludes 100% Service Connected Disabled Veterans program

The proportion of claimants in each of the eligibility status categories shown in the above table has not changed appreciably in several years.

### State Audit of Claims:

In its annual audit of applications, the tax commission attempts to determine the validity of all claims submitted. Since the inception of this audit process in 1977, net savings of \$8.6 million (including re-audit collections) have been realized. Direct net audit savings related to 2022 claims increased 87% in 2022 to \$939,317. This was due to the claimants deemed ineligible by the median value of their property, which increased audit savings by \$771,261. Excluding this amount, net audit savings were \$168,056, slightly higher than 2021. This was supplemented by re-audit of prior year claims using additional data not originally available, resulting in additional collections on deficiency notices in the amount of \$134,223. Total audit program savings were \$1,073,540 during 2022.
